

Contents

Section 1: Clinical Pharmacy

1. Introduction to Clinical Pharmacy	3
2. Weights, Measures and Abbreviations	7
3. Labeling of Drugs	13
4. Pharmacy Preparations	21
5. Common Dosage Forms and Routes of Administration-I	30
6. Common Dosage Forms and Routes of Administration-II	39
7. Common Dosage Forms and Routes of Administration-III	54

Section 2: Experimental Pharmacology

8. Introduction to Experimental Pharmacology	73
9. Effects of Drugs on Rabbit Eye	75
10. Effect of Drugs on Frog Heart	80
11. Effect of Drugs on Rabbit Intestine	86
12. Effect of Drugs on Dog Blood Pressure	90
13. Short Experiments for Efficacy and Safety	94
14. Ethics and Animals	98

Section 3: Clinical Pharmacology

15. Introduction to Clinical Pharmacology	103
16. Pharmacokinetic Parameters and Calculations	104

17. Prescription Writing Through Problem Based Learning (Rational Prescribing).....	112
18. Critical Evaluation of Prescription (Audit of Prescriptions)	157
19. Problem Based Drug Interactions	162
20. Adverse Drug Reaction (ADR) Monitoring	178
21. Therapeutic Drug Monitoring (TDM)	187
22. Drug Use in Special Population/Diseases/Physiological Conditions.....	194
23. Critical Appraisal of Drug Promotional Literature	207
24. Therapeutic Follow-up Cases/Problems	215
25. New Drug Development	219
26. Calculation of Drug Doses and Dilutions	223
27. Evaluation of Drug Formulations	232
28. Ethics and Humans	238
29. Management of Some Common Poisonings	243
30. Objective Structured Practical Examination (OSPE)	253
<i>Appendix I</i>	257
<i>Appendix II</i>	259
<i>Appendix III</i>	261
<i>Appendix IV</i>	262
<i>Terminologies Used in Pharmacology</i>	283
<i>Index</i>	287
