### Salient Features
- Prepares in simple straightforward language.
- Describes the basics of each consideration involved in orthopedics and trauma.
- Contains the minimum required information about the etiology, pathology, classification and management for the body of description about the disease, injury and allied problems.
- Gives the condensed description on clinical methods with illustrations, line drawings of basic implants, amputation, orthotics, physiotherapy and accident management.

### Reviews
1. Most of the important topics from undergraduate exam point of view have been covered.
2. Reader friendly language.
3. Easy to remember and reproduce.
4. Additional information has been provided at the end of each chapter.
5. Includes nice illustrations and diagrams, making the subject interesting and easy-to-grasp.

Dr. Sultan Moinuddin (Gold Medallist)

**Top Amazon Review ★★★★★**
Saviour!! The saviour of orthopedics during my UG Days. Really nice book, well written, detailed description in easy language. Helps me a lot during the preparation of final MBBS exams.

You can singlehandedly rely on this book for final MBBS examination. Very good book for academics.

Even for today, I read it sparingly for PG entrance Exam.

IADVL’s Concise Textbook of Dermatology
by Gupta

Salient Features
• Updated, concise and thoroughly illustrated.
• Contains 42 chapters, revised and updated by eminent authors across India.
• Includes new chapters like Dermatosis Affecting Mucosa, Dermatological Emergencies, and Diseases of vascular system, Vasculitis and Leg Ulcers.
• Incorporates recent advances and evidence based treatment approach.
• Each chapter begins with ‘learning objectives’ followed by structured pattern including introduction, etiopathogenesis, clinical features, differential diagnosis and management.
• Includes key learning points and MCQs.
• High-yield points have been highlighted in boxes for quick revision.
• Supplemented with clinical photographs, illustrations, tables and flowcharts for better understanding.

Essentials in Dermatology, Venereology & Leprology
by Bansal

Salient Features
• The book consists of 25 chapters distributed in 5 sections: Dermatology, Venereology, Leprology, Cosmetology and Acquired immunodeficiency syndrome.
• Text presented in a bulleted format in concise yet comprehensive manner which makes the retention of concepts stronger than ever.
• Usage of simple and lucid language.
• Includes more than 600 clinical photographs, over 100 line diagrams and histological representatives of various skin diseases and their presentation.
• Many flowcharts and tables have been added for a quick grasp of the related topic.

A Short Textbook of Psychiatry
by Ahuja

Salient Features
• This twentieth year edition aims to provide a brief yet comprehensive account of the psychiatry disorders.
• The text has been aligned to the most recent developments in classification, terminology and treatment methods.
• Significant changes have been made in several chapters, especially in the chapters on diagnosis and classification incorporating ICD-10 at most places and DSM-IV-TR wherever appropriate, psychoactive substance use disorders, psychopharmacology, schizophrenia and other biological methods of treatment.
• User friendly colour shaded boxes have been made at various places to highlight the important points in tables and figures.
Short Textbook of Anesthesia
by Yadav

Salient Features

• Most suitable for undergraduate and postgraduate aspirants.
• May serve as a last moment revision book for MD/DA/DNB students
• A quick reference for practicing anesthetists
• Text is divided into nine sections to increase the comfort of reading
• The most important points are presented in italics.
• Key points are given at the end of each chapter.
• Summary of topics presented in a tabular form.
• Commonly encountered controversies have been tried to be resolved as far as possible.
• The most recent advances in drugs, equipment and techniques have been incorporated.
• Cardiopulmonary resuscitation (CPR) guidelines are based on the American Heart Association (AHA), 2015 update.

Essentials of Anesthesia & Critical Care
by Jain

Salient Features

• The whole book is divided into two sections: Anesthesia and critical care which is further divided into eight units.
• Text is kept concise and also formatted in a student-friendly manner.
• Tables, line diagrams and key points have been added in each chapter for a quick grasp of the respective topic.
• Questions asked in previous years’ PGMEE have been denoted by “Q” as superscript in theory portion itself.
• Each chapter is followed by review questions that includes previous years PGMEE and National Eligibility cum Entrance Examination (NEET) based sample questions] for students which will help them to reinforce and understand the related topic in a better way.

Radiology for Undergraduates and General Practitioners
by Singh & Pardesi

Salient Features

• The book has been structured such that the student is introduced to radiology and at the same time is prepared to do well in the examination without taking too much of his time.
• Images have been provided to give a better understanding.
• Covers all questions asked in the examination.
• Syllabus in radiology for undergraduates given at the end.
• Covered in 20 lectures of one hour duration each and one clinical postings of two weeks in radiology department.
• The book will be a great asset for the general practitioners who will find his day-to-day imaging solutions in this.
