Latest & Excellent Resources in Anesthesiology

for Trainees, Practicing Anesthesiologists and Intensivists

**NEW**

A step-by-step decision making algorithmic approach in Anesthesiology by internationally recognised experts from University of Texas Health Science Centre, USA

₹ 2750

Published under the aegis of Indian College of Anesthesiologists

₹ 1650
Critical Care Update 2020

₹ 1495

CRITICAL CARE MEDICINE MCQs PRACTICE BOOK

₹ 1095

CRITICAL CARE ULTRASOUND
for Emergency Situations and Clinical Applications

₹ 1650
WORKBOOK ON HEMODYNAMIC MANAGEMENT (ISCCM)
Sameer Jog, et al.

WORKBOOK ON RENAL REPLACEMENT THERAPY IN ICU
Valentine Lobo, et al.

PRINCIPLES IN CRITICAL CARE NUTRITION (ISCCM)
Subhal Dixit, et al.

ADMINISTRATIVE ASPECTS OF CRITICAL CARE
Abhinav Gupta, et al.

CRITICAL CARE UPDATE 2020 (ISCCM)
Subhash Todi, et al.

CRITICAL CARE UPDATE 2019 (ISCCM)
Subhash Todi, et al.

**Prices (₹)**
- Workbook on Hemodynamic Management (ISCCM): ₹1095
- Workbook on Renal Replacement Therapy in ICU: ₹950
- Principles in Critical Care Nutrition (ISCCM): ₹1095
- Administrative Aspects of Critical Care: ₹495
- Critical Care Update 2020 (ISCCM): ₹1495
- Critical Care Update 2019 (ISCCM): ₹1395
New Releases 2019-20

Textbook of Hemodynamic Monitoring and Therapy in the Critically Ill
Atul Prabhakar Kulkarni, et al.

Textbook of Ventilation, Fluids, electrolytes and Blood Gases
Mohan Gurjar

Anesthetic Equipment Made Easy
S Ahantha Pillai

Handbook of Pharmacology for the Anesthesiologists
Lopamudra Chowdhury, et al.

Evidence Based Core Topics in Critical Care Medicine 2019
Ross Callum Freebairn & Atul Prabhakar Kulkarni

Emergency Medicine: Best Practices at CMC (EMAC)
KPP Abhilash

Price Details:
- Textbook of Hemodynamic Monitoring and Therapy in the Critically Ill: Rs 1650
- Textbook of Ventilation, Fluids, electrolytes and Blood Gases: Rs 2195
- Anesthetic Equipment Made Easy: Rs 950
- Handbook of Pharmacology for the Anesthesiologists: Rs 550
- Evidence Based Core Topics in Critical Care Medicine 2019: Rs 995
- Emergency Medicine: Best Practices at CMC (EMAC): Rs 850
New Releases 2019-20

Principles and Practice of Critical Care Toxicology
Omender Singh & Deven Juneja

Case-based Review in Critical Care Medicine: A Comprehensive Preparatory Book for the Examinee
Atul Prabhakar Kulkarni, et al.

101 Clinical Cases in Emergency Room
Badar M Zaheer

Ramamurthy’s Decision Making in Pain Management
An Algorithmic Approach
Ameet Nagpal, et al.

Objective Anesthesia Review
A Comprehensive Textbook for the Examinees
Atul P Kulkarni, et al.

MCQs in Critical Care
Yatin Mehta & Prashant Kumar

---

**Key Features**

- A concise pain management textbook to assist the reader in making a clinical decision during a patient visit.
- Evidence-based content, based on the anecdotal experience of the authors.
- Each chapter contains 1-2 pages of text and a clear and algorithmic approach to the particular topic.
- Provides cutting-edge treatment options and advanced neuromodulatory technologies.

**Key Features**

- A comprehensive review book on anesthesia.
- Provides a fully revised and updated text as per the latest evidence of the management of various cases as well as the new guidelines.
- Presents the text in an easy-to-follow question-answer format.
- Thoroughly discusses the equipment and table wine topics, such as arterial blood gases (ABGs), electrolycardiograms (EGCs), pulmonary function tests (PFTs), cardiopulmonary exercise testing (CPET), etc. normally encountered in the examination.

**Key Features**

- All new MCQs based on core concepts on each topic.
- Each question has separate explanations and references for further reading.
- Chapter-wise arranged MCQs.
- Two model question papers for practice.
- A must read book for all interested in critical care.
Handbook of Pulmonary and Critical Care Medicine
SK Jindal

Key Features
- Presents concise, yet comprehensive information for day-to-day practice.
- Includes 101 chapters to cover clinical respiratory medicine, critical care, sleep medicine, and respiratory perspectives.
- It is reader-friendly with simple language.
- Written by eminent authors from across the globe.
- Useful for educators, pulmonologists, intensivists, intensivists, pediatricians, medical students, and practitioners who are treating patients with lung diseases.

Single Colour | Soft Cover | 1/e, 2019
6.25"x9.5" | 828 pp | 9789352706350
₹ 1650

Atlas of Critical Care
Yatin Mehta & Jeetendra Sharma

Key Features
- Consists of 8 sections which are further divided into chapters according to different domains of sections contributed by separate author(s).
- All major specialties related to critical care are covered in initial seven sections and last section covers rest of specialties and miscellaneous images.
- Includes images of various radiological studies relevant to critically ill patients.
- Must for any modern ICU and exam-going students.

Full Colour | Hardbound | 1/e, 2019
8.5"x10.75" | 664 pp | 9789352705016
₹ 5495

Understanding Anesthetic Equipment & Procedures: A Practical Approach
Dwarkadas K Baheti & Vandana V Laheri

Key Features
- This is the second edition after tremendous success of the first.
- Written by experts with high academic credentials, inclination, and capability.
- Gives an insight into the basic physics as well as the mechanism involved in the structure of various equipment used in anaesthesia and critical care clinic.
- Only “anesthesia equipment” book that includes DVD-ROM that serves as an audio visual aid for a clear understanding of day-to-day anesthetic procedures.

Full Colour | Soft Cover | 2/e, 2018
8.5" x 11" | 578 pp | 9789352703166
₹ 2995

Yearbook of Anesthesiology-8
Raminder Sehgal & Anjan Trikha

Key Features
- Published by the Indian College of Anesthesiologists.
- An excellent source of anesthesia literature on current practices.
- Includes topics of current interest to both students and practicing anesthesiologists.
- Reviewed by experts from various subspecialties of anesthesia, general and regional anesthesia, critical care, and chronic pain.
- Recommended reading for the trainee, practicing anesthesiologists and for the intensivists.

Single Colour | Soft Cover | 1/e, 2019
6.25"x9.5" | 368 pp | 9789352706037
₹ 1895

A Handbook of Emergencies
Aspi F Golwalla & Sharukh A Golwalla

Key Features
- Revised edition of the popular pocket reference.
- Covers in brief the diagnosis and management of common and uncommon emergencies encountered in day-to-day practice by the clinicians.
- Aims not to delay in the diagnosis and appropriate pharmacotherapy and necessary aids for a successful outcome.
- Covers topics on pediatrics, dermatology, ENT, ophthalmology, gynecology, psychiatry, gastroenterology, respiratory and cardiovascular, neurology, hematology, urology, immunology, oncology, forensic and community medicine, and surgery.

Single Colour | Soft Cover | 9/e, 2019
4"x6" | 580 pp | 9789352709317
₹ 550

Ultrasound in Critical Care
Puneet Khanna

Key Features
- Comprehensive coverage of the fundamentals of ultrasound use in critical care.
- Guidance on ultrasound procedures enables practitioners to use ultrasound for vascular and therapeutic procedures.
- Cardiac ultrasound chapters help you assess and monitor the patient’s cardiopulmonary status noninvasively.
- Color presentation, within illustrations that emphasize the basic skills required to visualize anatomic structures and interpret findings.

Single Colour | Soft Cover | 1/e, 2019
6.75"x9.5" | 310 pp | 9789352701681
₹ 1950
Applications of Ultrasound in Anesthesia: A Handbook
Kavita S Lalchandani

Practical Applications of Intravenous Fluids in Surgical Patients
Shaila Shodhan Kamat

Interventional Pain Management: A Practical Approach
Dwarkadas K Baheti, et al.

Key Features
- Presents the text in simple language.
- Provides practical tips about ultrasound-guided procedures in anesthesia.
- Includes basic terminologies of ultrasound along with neat and clean images.
- Helpful to the readers while performing the ultrasound-guided procedures.
- A must for the students, beginners and practitioners of ultrasound.

Key Features
- Includes the fundamentals of body fluid balance.
- Detailed discussion of all the commonly used intravenous fluids.
- Compact and yet detailed practical approach to fluid therapy in various surgical conditions. Wide array of self-explanatory figures.
- Language used is lucid and easy to understand.
- Conveys the knowledge in a simplified and systematic manner.
- Serves as a good teaching guide to the advanced users, too.

Key Features
- A comprehensive guide, which includes the latest advances in anaesthesia and brand new content.
- Edited by international experts in anaesthesiology from the US, UK and India.
- Enhanced by nearly 400 images and illustrations and an accompanying DVD depicting common interventional pain treatment procedures and a stepwise guidelines.
- An essential resource for anaesthesiologists and all pain management clinicians.

Forthcoming Books

Textbook of Critical Care Including Trauma and Emergency Care
Yatin Mehta

Handbook of Pain Management
A Case-based Approach
Under the aegis of Society for Study of Pain, Mumbai
Jitendra Jain

Airway Management
Geetanjali S Verma

ICU Manual
Prem Kumar

Principles of Critical Care
Farokh Erach Udwalla

Key Features
- This book provides extensive coverage of most primitive to most modern monitoring technologies.
- A comprehensive yet concise description of various monitors is included.
- Includes structured text on obstetric critical care.
- Focuses on research based upcoming monitoring ideas like quantifying pain, sedation, and maternal/ fetal safety improvement.

Key Features
- A comprehensive compilation of a variety of topics in anesthesiaology and its subspecialty.
- With 53 chapters, the book is an amalgamation of key insights tempered and supported by evidence-based literature.
- Emphasized on airway management, postoperative evaluation, risk stratification, and newer horizons in critical care, palliative and pain medicine.
- Imparts knowledge and insights for the busy clinician and the PG students.

Key Features
- Chapters are written by the renowned Pain Physicians of Mumbai, under the aegis of Society for Study of Pain (Mumbai SSPM).
- Explains in short and simplified stepwise approach to identify and diagnose different types of pain along with stepwise direction to treat the pain.
- Useful to medical fraternity to manage any type of pain.

Key Features
- A single book that compile all details pertaining to airway management.
- Explains anatomy, physiology and pharmacology.
- Includes latest guidelines in airway management.
- Discusses ultrasound and airway.
- Contains latest equipment in airway management.
- Useful for those preparing for MD/DM /Anesthesia superspecialty in India or FICA/EDAC/EDC in the European subcontinent to USMLE and Anesthesia examinations in USA/Canada

Key Features
- Includes simplified presentation of the basic concepts of critical care enabling the reader for better understanding of the topic.
- Provides multidisciplinary clinically oriented approach in dealing with the critical care illnesses, including pathophysiology, diagnosis and management of conditions with recent guidelines.
- Presents colorful illustrations, flow charts, drug dosages, clinical scores to help the clinician for faster reference.
- It is a comprehensive and user-friendly book for postgraduates of internal medicine, anesthesia, pulmonary medicine, surgery, emergency medicine and other specialties.

Key Features
- A standard text on critical care medicine.
- Critical illnesses are explained with regards to their clinical features, pathophysiology, diagnosis and management.
- The critical care of fulminating infections in the tropics is given special emphasis.
- Deals with critical care problems common to both East and West.
- Includes excellent images in relation to pathologies involving the chest, abdomen and central nervous system.

CATALOGUE 2020-21
A Manual of Intensive Care
Vinod Kumar Singh

Key Features
- A concise yet informative manual.
- Overviews the subject of critical care medicine and intensive care in a systematic manner.
- Covers the essential topics related to intensive care medicine and emergency management of critically ill patients.
- Presents the text in a simple language with elaborated illustrations and diagrams.
- Provides an easy explanation of the procedures and techniques relevant to intensive care practice.

Textbook of Emergency and Trauma Care
Devendra Richhariya

Key Features
- A comprehensive book covering almost all aspects of emergency medicine such as prehospital care, in hospital care, trauma, toxicology, and management of mass casualty.
- Contains 16 sections and 100 chapters, enriched with knowledge of about more than 100 contributors.
- Includes prehospital care and care of patient during transfer.
- Describes concept of road and air transfer of patient, triaging and rapid assessment of patient, point of care testing, care of critically ill patient in emergency.

Rudy Garza III

Key Features
- A comprehensive and an easy-to-read book on extracorporeal membrane oxygenation (ECMO) for the first time in India
- Includes topics such as ECMO and sepsis, Infection control in ICU, ECHO and ECMO, ECMO in noncardiac surgery, and ECMO and continuous renal replacement therapy (CRRT), which have not been described in literature with ECMO earlier
- Illustrations with easy-to-understand colored flow diagrams on ECMO hardware and circuit
- Contains more than 1,100 multiple choice questions (MCQ).

₹ 950

Textbook of Pulmonary and Critical Care Medicine
SK Jindal

Full Colour | Hardbound | 2/e, 2017
6.75" x 8.5" | 2118 pp | 9789350069994
₹ 13195

Key Features
- Divided into two volumes containing 163 chapters in total.
- Completely revised edition with updated information, referenced with most recent citations.
- Specifically focuses on pathophysiology, pulmonary interventions, newer diagnostic techniques and treatment modalities.
- Contains separate sections on respiratory history, physiology, pharmacology, radiology and diagnostic techniques.
Key Clinical Topics in Orthopaedic Trauma
Alex Trompeter, et al.

Practice Guidelines in Anesthesia - 2
SK Malhotra

Short Textbook of Anesthesia
Ajay Yadav

Key Features
- 100 topics presented in alpha order, from Amputations – mangled extremities and decision making, to Whiplash.
- Succinct coverage of orthopaedic trauma treatment modalities and complications.
- Effective exam revision for FRCs (T&O/Ortho) candidates.
- Ideal quick reference for day-to-day practice.

Key Features
- An official publication of Indian College of Anaesthesiologists (ICA), an academic branch of Indian Society of Anaesthesiologists (ISA).
- Contains twenty six current topics that cover the recent practice guidelines for preoperative preparations, perioperative problems and their management during anesthesia, pain management and critical care therapy.
- Includes chapters on current practice in Cardiopulmonary Resuscitation, organization of anesthesia department and ethical practice.

Key Features
- Focuses on the topics asked more frequently in pre-PG examinations.
- Most important points are presented in italics.
- Key points are given at the end of each chapter.
- Summary of topics has been presented in a tabular form.
- Recent advances in drugs, equipment and techniques have been incorporated.
- Cardiopulmonary resuscitation (CPR) guidelines are based on the American Heart Association (AHA), 2015, updates.

The Protocol Book for Intensive Care
Soumitra Kumar

Review of Cardiac Anesthesia & Cardiac Critical Care (Under the aegis of SCA-Delhi and NCR)
Poonam Malhotra Kapoor

Practical Approach to Critical Care in Obstetrics
Jyotsna Suri, et al.

Key Features
- The book represents guidelines for the diagnosis and management of common medical emergencies.
- It covers cardiac problems, respiratory, gastrointestinal, renal diseases and diabetes.
- It has the same objectives as the American Heart Association / American College of Cardiology’s Pocket Guidelines.
- Extremely useful for practicing physicians.

Key Features
- In this review, the reader stays current on the latest advanced techniques in the subject of Cardiac Anesthesia with a new section on cardiac critical care – the first of its kind in a MCQ format.
- Dedicated chapters on echocardiography with explanations, formulas, schematic diagrams and videos.
- Contains 2,100 Multiple Choice Questions (MCQs) in Cardiac Anesthesia and Cardiac Critical Care with more than 100 videos on echocardiography.
- Well suited for all candidates seeking for DM, FRH, FACC/FA/CC, Fellowship in Transesophageal Echocardiogram (TEE)/FVECC examinations in cardiac anesthesia and cardiac critical care.

Key Features
- This book is presented in a concise and clear format.
- Includes chapters as well as safety check lists of equipment and evaluation of the quality of care.
- It has been penned by a multidisciplinary group of experts in the field.
- An easy-to-follow and valuable book which makes for good reading for all, from postgraduates to the practicing clinicians and nurse practitioners.
The Vent Book
A Guide to Mechanical Ventilation in Emergency Room
Kishalay Datta

Principles and Practice of Ophthalmic Anaesthesia (Sankara Nethralaya)
Jaichandran VV, et al.

MCQs in Mechanical Ventilation
A Case-based Approach (With Explanatory Answers)
Sanjith Saseedharan

Symptom Oriented Pain Management
Dwarkadas K Baheti, et al.

Clinical Simulation in Medicine
for all Examinations in Cardiology, Critical Care, Anesthesia and Pulmonary Medicine
Poonam Malhotra Kapoor

Anesthesia Review
Kaushik Jothinath

Key Features
- Deals with all necessary topics related to ventilation only.
- Presents all the topics in a simple and easy language with all basic information for residents and students of emergency medicine in their patient management.
- Brings all topics related to mechanical ventilation in emergency room under one roof.
- Serves as a quick reference and guide for all undergraduates, interns, residents, doctors working in the emergency room and ICU.

Key Features
- First of its kind, provides basic clinical knowledge and practical information about anaesthesia for ocular surgery.
- Intended to be a ready reference for anaesthesiologists, ophthalmologists and other healthcare professionals.
- It is enriched by chapters on ocular physiology, pharmacology, systemic effects of ocular medications, effect of anaesthesia on pupil and management of painful/blurred eye.
- Many illustrations have been included for easy understanding and collating the information.

Key Features
- Case-based discussion on mechanical ventilation.
- Problem-based solving approach.
- Includes multiple-choice questions.
- Explorations provided of each answer bringing out the reasoning of the right as well as the wrong answer.
- Relevant references are provided.
- Easy reading for better understanding.
- Day-to-day problems addressed.

Key Features
- A comprehensive and practical book inclusive of various types of pains concerning the individuals as well as the treating physicians.
- Divided into sections covering basics, clinical examination and evaluation, cervical and neck pain, low back pain, urogenital and pelvic pain, and cancer, neuropathic, ischemic, myofascial, scar, and challenging pains.
- Accurately presents the techniques for diagnosing the etiology and mechanism of different types of pains, which often cause a dilemma for physicians.
- Depicts appropriate clinical management of pains with psychotherapy, allied therapy, physical therapy as well as alternative interventional procedures, wherever necessary.

Key Features
- A first of its kind manuscript from India and Asia.
- Written and edited by the experts in simulation for clinical medicine.
- Main attraction of the book is its simplicity of the text, lucidity of expression and clarity of description of the subject with vivid detailing illustrations.
- Fully up-to-date with recent researches and practices.
- Covers the most parts of cardiac critical intensive care on simulators.

Key Features
- Covers most of the DNB questions over the last 10 years.
- To-the-point description.
- Extensively researched.
- Fact-based, no needless details.
- Only textbooks have been referred to avoid confusion.
- Easy diagrams and tables.
- Easy to reproduce in examinations.
