Contents

1. Shock
Various types of shock 1

2. Endocrine and Metabolic Response to Injury
Introduction 12; The neuroendocrine response 12; Metabolic changes following injury 17; Enteral nutrition in major injury 19

3. Wound Healing
Cellular components of a healing wound 22; Factors influencing wound healing 24; Types of wounds and their management 26; Surgical technique and wound healing 28; Wound dehiscence 28; Healing of specialised tissues 29

4. Scars, Keloids and Skin Grafting
Scars and keloids 31; Types of bad scar 32; Tissue loss and its treatment 35

5. Burns
Burns 42; Epidemiology of burn trauma in India 42; Applied anatomy of burns 43; Depth of burn 45; Local treatment of burns 46; Management in the hospital 47; Complications of burns 50; Nutritional requirements of a burn patient 52; Skin grafting of burnt areas 53; Special burns 53; Burn contracture 54

6. Ulcers, Sinuses and Fistulae
Ulcers 57; Classification of ulcers 58; Local examination 62; Principles of ulcer treatment 63; Certain types of ulcers 64; Sinuses 70; Pilonidal sinus 71; Fistulas 74

7. Infections with Special Reference to Surgery
Source of infection 76; Transmission of infection 76; Prevention of infection 77; High risk infection procedures 79; Body reaction to infection 79; Causative agents of infections 80; Certain bacteria of surgical interest 82; Certain bacterial infections 90; Certain fungal infections 112; Certain viral diseases 114; Poliomyelitis 123; Sexually transmitted diseases 123; Sexually transmitted viral diseases 128; Opportunistic infections 132; Antimicrobial drugs 135; Certain antimicrobial drugs 138; Antitubercular drugs 146; Antileprosy drugs 148; Antifungal drugs 148; Antiviral drugs 151
8. **Parasitic Infestations of Surgical Importance**
   - Hydatid disease 155
   - Intestinal amoebiasis 158
   - Amoeboma 159
   - Amoebic liver abscess 160
   - Ascariasis (Roundworm infestation) 161
   - Guinea worm disease 164
   - Schistosomiasis 168
   - Filariasis 169
   - Leishmaniasis 170
   - Cutaneous leishmaniasis (Oriental sore, Delhi boil) 170
   - Visceral leishmaniasis (Kala-azar) 171
   - Clonorchiasis (Liver fluke infestation) 172

9. **Fluid and Electrolyte Balance**
   - Normal balance 173
   - Disturbances of fluid and electrolyte balance 174
   - Specific electrolyte disorders 175
   - Acid-base balance 178
   - Acid-base abnormalities 178
   - Fluid and electrolyte balance after a surgical operation 180
   - A plan for postoperative fluid and electrolyte balance 181

10. **Haemostasis and Blood Transfusion**
    - Introduction 183
    - The haemostatic balance 186
    - Blood coagulation tests 187
    - Abnormal haemostasis 187
    - Blood transfusion 191
    - Blood substitutes 195
    - Autologous blood transfusion 195
    - Blood components 196

11. **Role of Nutrition in Surgery**
    - Energy expenditure in surgical patients 200
    - Nutritional requirements 200
    - Nutritional assessment 202
    - Nutritional support 203
    - Nutritional support in renal disease 210
    - Nutrition in liver diseases 210
    - Nutrition and cancer 211
    - Home parenteral nutrition 211

12. **The Preoperative Care of a Surgical Case**
    - Preoperative evaluation and care 213
    - Preanaesthetic consultation 217
    - Informing the patient 218
    - Preoperative orders 218
    - Preoperative care in certain specific situations 219

13. **The Postoperative Care of a Surgical Case**
    - Care in the recovery room 223
    - Transfer to the surgical ward 224
    - Postoperative respiratory failure 225
    - Postoperative pain control 227
    - Postoperative fluid and electrolyte balance 229
    - Postoperative complications 230
    - Respiratory complications 230
    - Cardiac complications 231
    - Gastrointestinal complications 233
    - Genitourinary complications 234
    - Other complications 234

14. **Organ Transplantation**
    - Basic immunology of tissue transplantation 236
    - Immunosuppressive therapy 238
    - Immunosuppressive protocols used by
various transplantation units 239; Cadaveric organ donation in India 240; Kidney transplantation 240; Liver transplantation 245; Pancreatic transplantation 248; Islet cell transplantation 250; Small bowel transplantation 251; Heart transplantation 251; Combined heart-lung transplantation 254

15. Lymphatics and Lymph Nodes
Applied anatomy 255; Lymphoedema 257; Chylous ascites 263; Chylothorax 264; Chyluria 264; Lymphangioma 264; Inflammatory disease of lymph nodes 265; Lymphomas 269; Hodgkin’s disease (HD) 269; Non-Hodgkin lymphoma (NHL) 272

16. Diseases of Veins
Functional and surgical anatomy 276; Varicose veins of the lower limbs 277; Venous ulceration 286; Deep vein thrombosis 287

17. Diseases of Arteries
Impaired circulation to the limbs 294; Atherosclerosis 300; Internal carotid artery atherosclerosis 304; Subclavian steal syndrome 305; Renovascular hypertension 305; Coronary artery ischaemia 306; Enteric artery occlusive disease 306; Buerger’s disease (Thromboangiitis obliterans, TAO) 306; Syphilitic arteritis 309; Arterial aneurysms 310; Abdominal aortic aneurysm 312; Ruptured abdominal aortic aneurysm 314; Congenital arterial disorders 314; Acute occlusion of a major peripheral artery 315; The non-specific aortoarteritis 317; Vasospastic disorders 319; Vascular trauma 321; Gangrene 323; Frostbite 327; Immersion foot (trench foot) 327; Intra-arterial injection of certain drugs 327; Amputations 328; Vascular tumours 332

18. Diseases of the Skin
Normal structure 335; Callosity, corns and warts 336; Skin cysts 337; Benign skin tumours 339; Premalignant conditions of the skin 341; Vascular lesions of the skin 343; Lymphangioma 345; Neurofibromatosis 345; Malignant disease of the skin 345; Disorders of melanocytes 349; Other malignant skin tumours 354

19. Diseases of Muscles, Tendons and Fasciae
Applied basic knowledge 356; Bursae 357; The soft tissue tumours 359; Tumour-like conditions of soft tissues 359; Benign tumours of soft tissue 361; Benign tumours of fat 361; Soft tissue tumours of intermediate malignant potential 362; Malignant tumours of soft tissue 363
20. Tumours of Bones and Joints
Benign tumours 371; Metastatic bone tumours 373

21. Infections of Bones and Joints
Anatomy of a long bone 377; Acute osteomyelitis 377; Post-traumatic osteomyelitis 381; Chronic osteomyelitis 381; Brodie’s abscess 382; Acute suppurative arthritis 383; Tuberculosis of bones and joints 383; Tuberculosis of spine 384

22. The Scalp, the Skull and the Brain
The skull and the raised intracranial pressure 387; Neuro-diagnostic procedures 387; Congenital abnormalities of skull 388; Bony tumours of skull 389; Head injury 390; Scalp 390; Skull 390; Injury to the brain 391; Pathology of craniocerebral injuries 392; Intracranial haemorrhage 394; Clinical diagnosis and management of a head injury case 396; Emergency care of a head injury 399; Late effects of head injury 401; Infantile hydrocephalus 402; Surgical treatment 404; Intracranial infections 405; Tuberculoma brain 405; Neurocysticercosis 406; Intracranial tumours 406; Intracranial vascular disease 408

23. The Spine and Spinal Cord
Applied anatomy 410; Spinal injuries 410; Developmental anomalies of the spine 411; Degenerative disease of the spine 415; Inflammatory disorders of spine 416; Deformities of spine 417; Spinal tumours 419; Spinal infections 420

24. Certain Affections of Nerves
Normal structure of a peripheral nerve 422; Injuries of the peripheral nerves 423; Neurapraxia 423; Axonotmesis 423; Neurotmesis 424; Diagnosis of nerve injury and secondary pathological changes due to nerve injury 424; Management of neurotmesis 425; Management of certain irremediable injuries 427; Individual nerves 428; Radial nerve 430; Median nerve 431; Ulnar nerve 431; Sciatic nerve 432; Cranial nerves 432; Tumours of the peripheral nerves 436; Neurofibromatosis 438

25. The Hand
Functional anatomy 440; Congenital anomalies 440; Infections of the hand 441

26. The Foot
Applied basic knowledge 454; Congenital talipes equinovarus (club foot) 454; Talipes calcaneovalgus 456; Metatarsus adductus 456; Flat foot (pes planus) 456; Claw foot (pes cavus) 457;
Hallux valgus 458; Hallux rigidus 458; Morton’s neuroma 459; Freiberg’s disease 459; March fracture 459; Plantar fasciitis 460; Hammer toe 460; Ingrowing toe nail 460; Onychogryphosis 461; Infections of the foot 461; Diabetic foot 461; Madura foot 464; Guinea worm disease 465; Arthritis affecting the foot 465

27. The Teeth, Gums and Jaws
Tumours arising from the jaw 468; Tumours arising from the tooth germ 468; Tumours arising from the gum (epulis) 470; Tumours arising from the jaw bone 472; Tumours of the maxillary antrum 473; Burkitt’s lymphoma 474; Surgically important complications of dental disease 475; Fractures of the fascial skeleton 476; Fracture of the middle third of the face 477; Mandibular fractures 479; Dislocation of temporomandibular joint 481

28. The Face, Lips and Palate
Development of the face 482; Cleft lip and cleft palate 483; Cleft lip 484; Cleft lip repair 485; Cleft palate 485; The Pierre Robin syndrome 487; Other developmental abnormalities of the face 487; Macrostoma and microstoma 488; Swellings of the palate 489; Carcinoma hard palate and upper alveolus 489; Perforation of the palate 490; Tumours of the lip 490; Carcinoma of the lip 492

29. The Mouth, Cheeks and Tongue
Stomatitis 495; Oral ulcerations 497; Oral cysts 499; Lesions of the tongue 500; Ulcers of the tongue 503; Benign tumours of the tongue and cheek 505; Carcinoma cheek 507; Carcinoma of the tongue 508; Carcinoma of posterior-third of tongue 512; The tonsils 513

30. The Salivary Glands
Surgical anatomy 515; Sialography 516; Inflammations 516; Parotid duct calculi 518; Sjögren’s syndrome 518; Mickulicz disease 518; Parotid fistula 519; Frey’s syndrome (the auriculotemporal syndrome) 519; Submandibular sialolithiasis 519; Tumours of the salivary glands 521

31. The Neck
Swellings of the neck 527; Inflammatory conditions of the neck 537; Metastatic spread to regional lymph nodes in the neck 541; Types of neck dissection 543
32. **Thyroid Gland**
   Anatomy 546; Physiology 547; Investigations 548; Congenital disorders 550; Goitre 551; Thyrotoxicosis 554; Hypothyroidism 558; Thyroiditis 559; Retrosternal goitre 560; Thyroid tumours and cysts 560; Malignancy of the thyroid gland 561; Thyroidectomy 564

33. **The Parathyroid Gland**
   Anatomy 568; Physiology 568; Hyperparathyroidism 571; Primary hyperparathyroidism 571; Secondary hyperparathyroidism 574; Tertiary hyperparathyroidism 575; Hypoparathyroidism 575

34. **The Adrenal Gland**
   Anatomy 577; Physiology 577; Cushing’s syndrome 578; Aldosteronism 581; Adrenal virilisation 582; Acute adrenal insufficiency 583; Chronic adrenal insufficiency (Addison’s disease) 583; Tumours of the adrenal medulla 584; Surgery of the adrenal gland 587; Surgical approach to the adrenal gland 587

35. **The Breast**
   Applied basic knowledge 589; Congenital anomalies of the breast 592; Diagnosis of breast disease 593; Clinical assessment 593; Imaging 593; Benign disease of the female breast 595; Mastalgia 596; Inflammatory and related lesions of the breast 559; Mammary duct ectasia 601; Galactocele 602; Fibroadenoma 602; Phylloides tumours of the breast 603; Duct papilloma 604; Benign diseases of the male breast 605; Malignant disease of the female breast 606; Non-invasive breast cancer 608; Invasive carcinomas 609; The spread of breast carcinomas 610; Early detection of cancer breast 611; Staging of breast cancer 612; Malignant disease of the male breast 619

36. **The Chest Wall, Pleura and Lungs**
   Diseases of the chest wall 621; Tumours of the chest wall 623; Diseases of the pleura 624; Tumours of the pleura 629; Diseases of the bronchi and lungs 630; Surgical treatment of pulmonary tuberculosis 634; Fungal infections of the lung 636; Pulmonary hydatid disease 638; Tumours of the bronchi and lung 639; Carcinoma of the bronchus 640

37. **Chest Injuries**
   Management at the site of accident 647; Prehospital care 648; Management at the hospital 648; Penetrating injuries 648; Non-
penetrating chest injuries 649; Fractured ribs 650; Traumatic flail chest 651; Traumatic pneumothorax 652; Traumatic haemothorax 653; Pulmonary contusion 653; Major bronchial injury 654; Injuries to oesophagus 654; Traumatic cardiac tamponade 655; Thoraco-abdominal injuries 655

38. The Diaphragm
Development of the diaphragm 657; Diaphragmatic hernia 658

39. The Mediastinum, Heart and Great Vessels
The mediastinum 664; Thymus 669; Myasthenia gravis 670; Mediastinal lymphoma 671; Congenital heart disease 671; Acquired heart disease 675; Disorders of rhythm 678; Ischaemic heart disease 678; Cardiac tumours 680; The surgery of the pericardium 680

40. The Oesophagus
Anatomy 682; Physiology 682; Investigations of oesophageal disease 683; Congenital oesophageal atresia and tracheoesophageal fistula 683; Dysphagia lusoria 686; Achalasia cardia (cardiospasm) 686; Chagas disease 688; Vigorous achalasia 688; Pharyngeal diverticulum 688; Cricopharyngeal achalasia 689; Oesophageal perforations 689; Foreign bodies in the oesophagus 691; Corrosive strictures of the oesophagus 692; Gastrooesophageal reflux 693; Benign tumours of the oesophagus 701; Carcinoma of the oesophagus 702; Miscellaneous oesophageal lesions 709; Monilial oesophagitis 710; AIDS and the oesophagus 710; Crohn’s disease of the oesophagus 710

41. The Spleen
Normal structure and function 711; Investigations of the spleen 712; Congenital abnormalities 712; Rupture of the spleen 713; Tropical splenomegaly syndrome (Bengal splenomegaly) 716; Thalassaemias 716; Malarial spleen 717; Kala-azar 718; Schistosomiasis 718; Hereditary spherocytosis (congenital haemolytic anaemia) 718; Acquired autoimmune haemolytic anaemia 719; Purpura 720; Gaucher’s disease 722; Cysts of the spleen 722; Hypersplenism 722; Splenic abscess 723; Tuberculosis of the spleen 723; Splenic tumours 723; Splenectomy 723; Overwhelming postsplenectomy infection (OPSI) 724

42. The Liver
Normal structure and function 726; Investigations in liver disease 728; Imaging of the liver 729; Liver injuries 730; Liver
abscess 734; Cysts of the liver 737; Viral hepatitis 740; Portal hypertension 741; Tumours of the liver 749

43. The Gallbladder and Bile Ducts
Anatomy and function 755; Investigations of the biliary tract in relation to diagnosis and treatment 756; Congenital conditions of the biliary tree 759; Biliary atresia 761; Gallstones 763; Acute cholecystitis 765; Chronic cholecystitis 769; Stones in the common bile duct 771; Acalculus cholecystitis 775; Cholesterolosis (strawberry gallbladder) 775; Cholesterol polyposis of the gallbladder 776; Typhoid gallbladder 776; Gallstone ileus 776; Cholecystectomy 777; Choledochotomy 781; Parasitic infestations of the biliary tract 785; Carcinoma of the gallbladder 786; Tumours of the bile duct 787; Carcinoma of the bile duct 787

44. The Pancreas
Normal structure and function 789; Investigations of the pancreas 791; Congenital abnormalities of the pancreas 793; Congenital cystic fibrosis of the pancreas (mucoviscodosis) 794; Injuries to the pancreas 794; Injury to pancreas during surgery 795; Pancreatitis 796; Cysts of the pancreas 806; Tumours of the pancreas 808

45. The Peritoneum, Omentum and Mesentery
Peritoneum 815; Peritonitis 816; Special forms of peritonitis 822; Intra-abdominal abscesses 825; Ascites 828; The mesentery 829; Role of omentum in surgery 831; Tumours of the peritoneum 831; Mesenteric cysts 832

46. The Stomach and Duodenum
Normal structure and function 835; Physiology of the stomach and duodenum 837; Investigations of the stomach and duodenum 838; Congenital conditions 839; Gastritis 843; Helicobacter pylori 843; Acute peptic ulcer and erosions 844; Peptic ulcer disease 845; Duodenal ulceration 846; Gastric ulcer 851; Malignancy in gastric ulcer 853; Complications of peptic ulcer 854; Perforated ulcer 854; Gastroduodenal haemorrhage 857; Pyloric stenosis 860; Hour-glass stomach 861; Carcinoma of the stomach 861; Other gastric tumours 869; Miscellaneous conditions of stomach and duodenum 869

47. The Small and Large Intestines
Normal structure 873; Developmental abnormalities 874; Atresia and stenosis of the jejunum and ileum 876; Certain intestinal
conditions occurring in infancy and childhood 885; Intestinal diverticulosis 888; Diverticular disease of the colon 889; Colonic diverticulitis 890; Volvulus 892; Compound volvulus 894; Intestinal pneumatosis 894; Acute necrotising enteritis 895; Inflammatory bowel disease (Crohn’s disease and ulcerative colitis) 895; Ileostomy 902; Intestinal tuberculosis 904; Intestinal amoebiasis 908; Radiation enteritis 910; Actinomycosis of the right iliac fossa 911; Intestinal complications of ascaris lumbricoides 912; Intestinal fistulae 913; Vascular abnormalities of small and large intestine 915; Tumours of the small intestine 915; Tumours of the large intestine 917; Colostomy 925; Stenting for malignant left colonic obstruction 926; Rare malignant tumours of colon 927

48. Intestinal Obstruction
   Mechanical obstruction 928; Paralytic ileus 935; Colonic pseudo-obstruction 936; Acute mesenteric ischaemia 936

49. The Vermiform Appendix
   Anatomical considerations 938; Appendicitis 939; Acute appendicitis 939; Appendicectomy 946; Chronic appendicitis 948; Mucocele of the appendix 948; Diverticulae of the appendix 948; Neoplasms of the appendix 949

50. The Rectum and Anal Canal
   Surgical anatomy 950; Symptoms and signs of rectal disease 952; Congenital anorectal anomalies 953; Sacrococcygeal teratoma 958; Postanal dermoid 959; Pilonidal sinus 959; Injuries of the rectum 960; Intrapерitoneal injury 961; Extraperitoneal injury 961; Prolapse of the rectum 962; Solitary rectal ulcer syndrome 966; Benign tumours of the rectum 967; Haemorrhoids (piles) 967; Carcinoma of the rectum 973; Anorectal abscess 979; Fistula in ano 981; Venereal warts (condylomata acuminata) 985; Fissure in ano 986; Non-malignant anal strictures 986; Malignant tumours of the anal canal 987

51. Hernia
   Inguinal hernia 990; Femoral hernia 1006; Abdominal wall defects in the newborn 1010; Umbilical hernia in infants 1014; Parambilical hernia of adults 1015; Epigastric hernia 1017; Postoperative burst abdomen 1018; Incisional hernia (Postoperative ventral abdominal hernia) 1018; Spigelian hernia 1020; Lumbar hernia 1020; Obturator hernia 1021; Sciatic hernia 1021
52. The Kidneys and Ureters
Applied basic knowledge 1022; Urinary symptoms and investigations 1024; Investigations of the urinary tract 1025; Physical signs of an enlarged kidney 1027; Congenital abnormalities of kidney 1027; Congenital abnormalities of the ureter 1028; Hydronephrosis 1031; Injuries to the kidneys and the ureter 1037; Urinary stones 1039; Ureteric stones 1052; Calculus anuria 1057; Kidney infections 1057; Acute pyelonephritis 1058; Chronic pyelonephritis 1058; Pyonephrosis 1058; Renal carbuncle 1059; Perinephric abscess 1059; Tuberculosis of the urinary tract 1059; Hydatid disease 1063; Tumours of the kidney 1063; Wilm’s tumour (Nephroblastoma) 1064; Hypernephroma (Renal cell carcinoma, Grawitz tumour) 1066; Renal sarcoma 1071; Tumours of the renal pelvis 1071; Surgical exposure of the kidney 1072

53. The Urinary Bladder
Normal development and structure 1076; Ectopia vesicae (Exostrophy of the bladder) 1077; The urachus 1078; Bladder stone 1079; Injuries to the bladder 1081; Injury to bladder during surgery 1082; Diverticulum of the bladder 1083; Cystitis 1084; Certain special forms of cystitis 1085; The bladder mechanism in the spinal cord lesions 1086; Tumours of the urinary bladder 1088; Epithelial tumour 1088; Transitional cell papilloma 1089; Transitional cell carcinoma bladder 1089; Pure squamous cell carcinoma bladder 1092; Pure adenocarcinoma bladder 1093; Urinary diversion 1095; Haematuria 1097; Anuria 1098; Acute retention of urine 1099

54. The Prostate and Seminal Vesicles
Applied basic knowledge 1101; Benign enlargement of the prostate 1102; Newer treatments for benign prostatic hypertrophy 1109; Pharmacotherapy 1113; Carcinoma prostate 1113; Bladder outflow obstruction due to bladder neck disease 1121; Inflammations of the prostate 1121; Prostatic calculi 1122; Tuberculosis of the prostate and seminal vesicles 1123

55. The Penis and Urethra
Applied basic knowledge 1125; Congenital abnormalities of the urethra 1126; Injuries of the male urethra 1129; Inflammations of urethra 1132; Urethral stricture 1134; Periurethral abscess 1137; Peyronie’s disease 1138; Priapism 1138; Phimosis 1139; Paraphimosis 1139; Balanoposthitis 1140; Preputial calculi 1141;
Circumcision in infants and children 1141; Circumcision in adults 1142; Genital herpes 1143; Lymphogranuloma venereum 1143; Genital warts 1143; Carcinoma penis 1143

56. The Testes and the Scrotum 1150
Surgical anatomy 1150; Diseases of the scrotum 1152; Maldescent of testis 1154; Retractile testis 1158; Testicular torsion 1158; Torsion of testicular appendages 1161; Acute epididymoorchitis 1161; Mumps orchitis 1162; Chronic tuberculous epididymitis 1162; Syphilitic orchitis 1163; Genital filariasis 1163; Hydrocele 1165; Haematocele 1169; Chylocele 1170; Varicocele 1170; Epididymal cysts 1174; Male infertility 1174; Vasectomy for sterilisation 1178; Testicular tumours 1179

57. Multimodality Approach to the Treatment of Cancer with Special Reference to Chemotherapy 1187
Radiation therapy 1187; Lasers in surgical oncology 1190; Cancer immunology 1191; Cancer chemotherapy 1192; Tumour markers 1196; Chemotherapeutic agents 1199; Hormones in cancer therapy 1203; Treatment of carcinoma of the oral cavity and oropharynx 1204; Treatment of testicular tumours 1206; Treatment of Wilm’s tumour 1207; Treatment of breast cancer 1207; Treatment of soft tissue sarcomas 1208; Carcinoma oesophagus 1210; Carcinoma of the stomach 1211; Pancreatic cancer 1212; Carcinoma of colon and rectum 1212; Carcinoma of the anal canal 1215; Carcinoma prostate 1215; Carcinoma of urinary bladder 1216; Cancer of the lungs 1218; Malignant melanoma 1219; Hodgkin’s disease 1220; Non-Hodgkin’s lymphoma 1221; Cancer cachexia syndrome 1222; Pharmacological control of cancer pain 1222

58. Surgical Instruments 1225
General surgical instruments 1225; Scissors 1227; Haemostasis 1228; Surgical diathermy 1229; Dissection forceps 1230; Needle holder 1230; Tissue forceps 1231; Retractors 1232; Instruments used during gastrointestinal surgery 1236; Instruments for biliary tract surgery 1237; Certain instruments used in urological practice 1239; Filiform bougies 1240; Certain bone instruments for general use 1241; Instruments for rib resection 1243; Miscellaneous instruments 1244; Varicose vein stripper 1246; Kocher’s thyroid dissector 1247; Hernia director 1247; Rubber goods 1247; Nasogastric tube 1249; Flatus tube 1249; Rubber drain 1250; Endoscopy 1251; Fibreoptic upper gastrointestinal endoscopy 1251;
Fibreoptic colonoscopy 1251; Endoscopic retrograde cholangiopancreatography (ERCP) 1252; Endoscopy of the lower urinary tract 1252; Ureteroscope 1252; Thoracoscopy 1252; Bronchoscopy 1252; Oesophagoscopy 1253; Sigmoidoscopy 1253; Proctoscopy 1253; Laparoscopy 1254; Lasers in surgery 1256

59. Surgical Sutures
According to biological behaviour 1258; According to filaments 1259; Qualities of a good suture 1259; Method of use of sutures 1259; Sterilisation of sutures and packaging 1260; Description of various sutures 1260; Needles 1264; Stapling devices for gastrointestinal anastomosis 1265

Index 1267
