3. SAFETY, BODY MECHANICS AND PREVENTION OF INFECTION  

3.1: Practicing Principles of Body Mechanics ................................................................. 126  
3.2: Moving a Patient Up in Bed ................................................................................... 128  
3.3: Turning a Patient to Lateral or Prone Position ......................................................... 130  
3.4: Logrolling a Patient ............................................................................................... 131  
3.5: Assisting a Patient to Sitting Position .................................................................... 134  
3.6: Transferring a Patient from Bed to Chair ............................................................... 135  
3.7: Transferring a Patient Between a Bed and a Stretcher ........................................... 137  
3.8: Providing Range of Motion Exercises ................................................................... 140  
3.9: Positioning of the Patient in Bed ............................................................................ 144  
3.10: Performing Medical Handwashing ..................................................................... 150  
3.11: Policies for Segregation and Disposal of Biomedical Waste .............................. 154  
3.12: Disinfection of Blood and Body Fluids Spills ....................................................... 156  
3.13: Prevention of Nosocomial Infections ................................................................... 159  
3.14: Applying Restraints ............................................................................................. 164  
3.15: Positioning and Restraining Children for Procedures .......................................... 168  

4. NUTRITION ........................................................................................................... 171  

4.1: Serving Normal Diet ............................................................................................... 172  
4.2: Feeding Helpless Patient ..................................................................................... 174  
4.3: Insertion of a Nasogastric Tube ............................................................................ 176  
4.4: Administration of Nasogastric Tube Feeding ......................................................... 180  
4.5: Feeding through a Gastrostomy/Jejunostomy Tube ............................................. 183  
4.6: Administration of Total Parenteral Nutrition ....................................................... 186  
4.7: Performing a Test Feed ....................................................................................... 190  

5. ELIMINATION ....................................................................................................... 191  

5.1: Assisting with the use of a Urinal ......................................................................... 192  
5.2: Applying a Condom Catheter ............................................................................... 193  
5.3: Performing a Urinary Catheterization ................................................................. 196  
5.4: Performing Catheter Care .................................................................................... 201  
5.5: Removing an Indwelling Urinary Catheter ............................................................ 203  
5.6: Performing a Bladder Irrigation ......................................................................... 205  
5.7: Assisting with use of Bedpan ............................................................................... 207  
5.8: Administering an Enema ..................................................................................... 209
10. SKIN INTEGRITY AND WOUND CARE

10.1: Performing a Wound Dressing ........................................................... 356
10.2: Dressing a Burns Wound ................................................................. 359
10.3: Removal of Sutures and Staples ...................................................... 362
10.4: Performing Wound Irrigation .......................................................... 365

11. ADVANCED CLINICAL PROCEDURES

11.1: Recording an Electrocardiogram (ECG) .......................................... 371
11.2: Preparation of Patient and Assisting with Exercise Stress Test ........ 374
11.3: Preparation of Patient and Assisting with Cardiac Catheterisation ... 378
11.4: Preparation of Patient and Assisting with Pacemaker Implantation ... 381
11.5: Performing a Cardiopulmonary Resuscitation (CPR) ................. 387
11.6(A): Performing Defibrillation and Advanced Cardiac Life Support (ACLS) 392
11.6(B): ACLS Algorithm ........................................................................ 396
11.7: Performing a Heimlich Manoeuvre (Adult) ..................................... 398
11.8: Assisting with Arterial Puncture ................................................... 401
11.9: Preparation for and Assisting with Digital Subtraction Angiography 404
11.10: Preparation for and Assisting with Cerebral Angiography ............. 406
11.11(A): Assisting with Insertion of Central Venous Catheter .......... 408
11.11(B): flushing a Central Venous Catheter ........................................ 412
11.11(C): Measuring Central Venous Pressure (CVP) ......................... 413
11.11(D): Changing Dressing at Central Venous Catheter Insertion Site 415
11.11(E): Changing the Central Venous Tubing ...................................... 416
11.12: Assisting with Bronchoscopy ....................................................... 417
11.13: Assisting with Endotracheal Intubation ....................................... 419
11.14: Assisting with Tracheostomy ....................................................... 422
11.15: Providing Tracheostomy Care ....................................................... 424
11.16: Performing Endotracheal/Tracheal Suctioning ......................... 428
11.17: Performing Oropharyngeal Suctioning ........................................ 432
11.18: Assisting with Thoracentesis ....................................................... 434
11.19: Connecting and Changing Intercostal Drainage (ICD) Bottles .... 436
11.20: Assisting with Removal of Chest Drainage Tubes .................... 439
11.21: Performing Gastric Suctioning ..................................................... 441
11.22: Assisting with Upper Gastrointestinal Endoscopy ..................... 443
11.23: Assisting with Endoscopic Sclerotherapy .................................... 446
11.24: Assisting with Insertion of Sengstaken-Blakemore Tube/Balloon Tamponade 448
11.25: Performing a Gastric Lavage or Stomach Wash ......................... 451
11.26: Preparation of Patient and Assisting with Barium Studies (Upper GI Series) 453
11.27: Preparation of Patient and Assisting with Barium Enema ........... 455
11.28: Preparation of Patient and Assisting with Colonoscopy ............ 457
11.29: Preparation of Patient and Assisting with Proctoscopy ............... 459
11.30: Assisting in Abdominal Paracentesis .......................................... 461
11.31: Preparation for Ultrasonography ................................................ 463
11.32: Assisting with Liver Biopsy ......................................................... 464
11.33: Assisting with Endoscopic Retrograde Cholangiopancreatography (ERCP) 467
11.34: Preparation for KUB X-ray ......................................................... 469
