Contents

1. Clinical Assessment of a Child with Heart Disease 1
   Shakuntala S Prabhu, Sumitra Venkatesh
   Gestational and natal history 1; Maternal conditions 2; Birth history and weight 2; Family history 2; Postnatal history 3; Physical examination 6; Cardiovascular assessment 8; Precordial examination 12

2. X-ray Chest for Evaluation of Pediatric Heart Diseases 26
   Savitri Shrivastava
   X-ray chest in left-to-right (L to R) shunts 30; Obstructive lesions 31; Cyanotic heart disease 33

3. The ECG: A Practical Approach to the Pediatric Electrocardiogram 40
   BRJ Kannan
   Basics of recording and interpretation 40

4. Imaging in Pediatric Cardiology 54
   A. Echocardiography
      BRJ Kannan, R Krishna Kumar
      Basics of echocardiography 54
   B. Role of CT, MRI and Radionuclide Scans in Pediatric Cardiopulmonary Disease
      Hemant Telkar, Bhavin Jhankharia, Abhijit Raut, Sona Pungavkar
      Role of 64 slice MDCT 63; MRI in congenital heart disease 66; Role of cardiac MR in fetal cardiology 71; Radionuclide imaging in pediatric cardiology 73

5. Diagnostic Cardiac Catheterizations in Children 75
   Snehal Kulkarni
   Precatheterization assessment 77; Premedication and sedation 77; Transport of neonate or sick infant to the catheterization laboratory 80; Imaging 80; Specific cardiovascular diseases and cardiac catheterization and angiography 80; Complications of cardiac catheterization 83

6. Heart Failure in Children 86
   Sreekanthan Sundararaghavan, R Krishna Kumar
   Management of CHF 91
7. Systemic Hypertension in Children  
Uma S Ali, Alpana Ohri  
Measurement of blood pressure 96; Causes 97; Investigations 100

8. Pulmonary Hypertension in Children  
Usha Krishnan  
Definition and classification 109; Persistent pulmonary hypertension of the newborn 110; Childhood pulmonary hypertension 111; Pathobiology of pulmonary hypertension 111; Diagnosis and investigations 112; Treatment 114

9. Syncope in the Young  
S Deshmukh, P Hingorani, S Deshpande, Y Lokhandwala  
Definition 119; Epidemiology 119; Evaluation of a patient with syncope 124; Management of syncope 127; Prevention of syncope on long-term basis 128

10. Chest Pain in Childhood  
M Zulfikar Ahamed, S Lakshmi  
Causes of chest pain 133; Specific types of chest pain 135; Laboratory Evaluation (Investigations) 136; Management 140

11. Arrhythmias in Children  
BRJ Kannan, R Krishna Kumar  
Classification of arrhythmias 142; Presentation of cardiac arrhythmias 144; Diagnosis and management of tachyarrhythmias 146

12. Congenital Heart Disease Introduction, Epidemiology and Classification  
Nitin Rao  
Congenital heart disease prevalence—the Indian scenario 155; Epidemiology 157; Maternal factors 158; Classification of CHD 162; A clinical classification of congenital heart disease general 163; Cyanotic 164

13. Left-to-Right Shunts  
R Krishna Kumar, Abhay Divekar  
Definition of terms 168; Perinatal changes in vascular resistances influencing; Left-to-right shunting 171; Factors determining magnitude of left-to-right shunts 171; Pathophysiology 172; Hemodynamics 173; Clinical features 173; The untreated large left-to-right shunt lesions 175; Management of patients with left to right shunts 175

14. Cyanotic Congenital Heart Disease  
Swati Garekar, Richard A Humes  
Total anomalous pulmonary venous return 181; Tricuspid atresia 183; Ebstein's anomaly 185; Tetralogy of Fallot 187; Tetralogy of Fallot with pulmonary atresia 189; Pulmonary atresia with intact ventricular septum 192; Double-outlet right ventricle 194; Hypoplastic left heart syndrome 195; Transposition of the great arteries 197; L-transposition of the great vessels 199; Truncus arteriosus 200; Univentricular atroventricular connection 202

15. Obstructive Acyanotic Congenital Heart Diseases  
Snehal Kulkarni  
Left sided obstructions 205; Right sided obstructions 215

16. Miscellaneous Congenital Cardiac Conditions  
Amar Taskonde  
Aortopulmonary septal defect 221; Aneurysm of the sinus of valsalva 222; Arteriovenous fistula, coronary 222; Arteriovenous fistula, pulmonary 223;
### Contents

Arteriovenous fistulas, systemic 223; Anomalous origin of the left coronary artery from the pulmonary artery 224; Congenital pericardial defect 224; Cervical aortic arch 225; Cor triatriatum 225; Congenital mitral stenosis 226; Congenital mitral insufficiency 226; Common atrium 227; Congenital anomalies of vena caval connection 227; Double-chambered right ventricle 228; Diverticulum of the left ventricle 229; Ectopia cordis 229; Hemitruncus arteriosus 229; Idiopathic dilatation of the pulmonary artery 230; Kartagener’s syndrome 230; Pulmonary artery stenosis 230; Patent foramen ovale 231; Pseudocoarctation of the aorta 231; Rubella syndrome 231; Scimitar syndrome 232; Taussig-bing anomaly 232

17. **Timing of Surgical or Catheter Intervention in Congenital Heart Disease**  
*R Krishna Kumar*  
Predicting the natural history of congenital heart disease 235; Spontaneous closure of defects 238; Procedural outcome 239; Guidelines for individual lesions 240

18. **Rheumatic Fever and Rheumatic Heart Diseases in Children**  
*M Zulfikar Ahamed, NC Joshi*  
Historical perspective 245; Epidemiology 246; Carditis 251; Chorea 254; Investigations 256; Dilemma in evaluation 264; Treatment 265; Prophylaxis 269; Anaphylaxis 269; Chronic rheumatic valvular disease 271; Mitral regurgitation 271; Mitral stenosis 273; Correlation between valve area and mean MV gradient 275; Rationale of drug therapy 276; Aortic stenosis 277; Aortic regurgitation 280

19. **Myocardial Disease**  
*R Krishna Kumar*  
Dilated cardiomyopathy 287; Diagnostic approach for dilated cardiomyopathy in children 289; Treatment 296

20. **Pericardial Disease**  
*Harinder R Singh*  
Anatomy and physiology 303

21. **Infective Endocarditis in Children**  
*Anita Saxena*  

22. **Kawasaki Disease: Diagnosis and Management**  
*M Zulfikar Ahamed*  
Historical perspective: a brief history of Kawasaki disease 328; Epidemiology 328; Etiopathogenesis 330; Laboratory evaluation 334; Terminologies in KD 337; Other investigations 338; Standard protocol followed in our institution 340; Kawasaki disease—other modalities of therapy 341; Long-term management 343

23. **Cardiac Manifestations in Systemic Illness**  
*Sumitra Venkatesh, Shakuntala S Prabhu, Mahesh K*  
Storage disorders 346; Collagen vascular diseases (connective tissue diseases, rheumatic diseases) 350; Endocrine and metabolic conditions 355; Hematological conditions 358; Neuromuscular diseases 359; Disorders of collagen synthesis 361

24. **Fetal Cardiology**  
*Shakuntala Prabhu, Sumitra Venkatesh*  
Fetal echocardiography 365; Importance of fetal echocardiography 365; Optimal timing of screening 366; Intrauterine interventions 374
25. **Diagnosis and Initial Management of Heart Disease in the Newborn** 376
   *R Krishna Kumar*
   Diagnosis of heart disease in the newborn 376; Circulatory support and inotropes 383; Transportation of sick newborn infants with heart disease 384

26. **Cardiac Implications of Changing Lifestyle: Prevention of Adult Cardiovascular Disease** 388
   *S Sivasankaran*
   Magnitude and definition of the problem 390

27. **Genetics of Congenital Heart Disease** 402
   *Sankar VH*
   Importance of identifying the genetic basis of CHD 402; Chromosomal disorders 403; Microdeletion syndrome and fish 404; Single gene disorders 406
   Evaluation for genetic basis in children with CHD 408; Genetic counseling in genetic syndromes with CHD 409

28. **Catheter-based Interventions in Children** 413
   *Shreepal Jain and Bharat Dalvi*
   Atrial septostomy procedures 413; Balloon valve dilatations 414; Transcatheter closure of intracardiac shunts 422; Cardiac interventions in complex congenital heart disease 426; Intravascular stents in congenital heart disease 427

29. **Surgery for Common Congenital Cardiac Defects** 433
   *Krishna S Iyer, S Vijay*
   General aspects of cardiovascular surgery 434

30. **Pediatric Cardiac Postoperative Intensive Care** 451
   *Rakhi B, Suresh G Nair, R Krishna Kumar*
   Specific aspects of cardiac surgery that impact patient care 451; Mechanical ventilation 456; Sedation, paralysis and pain management 458; Fluid and electrolyte management 460; Nutrition 463; Management issues associated with specific surgeries 465; Corrective procedures 468; Common postoperative problems after pediatric cardiac surgery 476; End organ injury 486

31. **Follow-up of Children Following Cardiac Surgery and Percutaneous Interventions** 501
   *BRJ Kannan*
   Patent ductus arteriosus (PDA) interruption (surgical or transcatheter intervention) 502; Atrial septal defect 502; Valvar pulmonary stenosis 503; Valvar aortic stenosis 504; Coarctation of aorta 504; Blalock-taussig shunt (systemic artery to pulmonary artery) 505; Tetralogy of Fallot 505; D-transposition of great arteries 506; Operations requiring the use of conduits 507; Pulmonary artery banding 507; Bidirectional Glenn shunt 507; Fontan procedure 508; Children on oral anticoagulation 508

32. **Drug Dosages** 510
   *Shakuntala Prabhu*

*Index* 531
