## Contents

### Section 1  Hematology Experiments

1. **Experiment 1: Compound Microscope**
   - Aim 3
   - Apparatus Required 3
   - Parts of the Compound Microscope 3
   - Total Magnification of the Compound Microscope 5
   - Precautions While Using the Compound Microscope 5
   - Other types of Microscope 5
   - Questions 6

2. **Experiment 2: Blood Sample Collection**
   - Aim 7
   - Apparatus Required 7
   - Procedure 7
   - Questions 8

3. **Experiment 3: Hemocytometer**
   - Aim 9
   - Principle 9
   - Apparatus Required 9
   - Description 9
   - Focusing the Counting Grid 10
   - Charging the Hemocytometer 10
   - Diluting Pipettes 11
   - Precautions 12
   - Questions 13

4. **Experiment 4: Enumeration of RBC**
   - Aim 14
   - Apparatus Required 14
   - Principle 14
   - Procedure 14
   - Calculation 16
   - Precautions 16
   - Discussion 17
   - Result 17
   - Questions 18

5. **Experiment 5: Estimation of Hemoglobin**
   - Aim 19
   - Principle 19
   - Apparatus Required 19
   - Procedure 20
   - Precautions 20
   - Result 21
   - Questions 21

6. **Experiment 6: Packed Cell Volume and Calculation of Blood Indices**
   - Aim 22
   - Apparatus Required 22
   - Principle 22
   - Procedure 22
   - Result 23
   - Calculation of Blood Indices 23
   - Questions 24

7. **Experiment 7: Determination of Erythrocyte Sedimentation Rate**
   - Aim 26
   - Principle 26
   - Methods 26
   - Westergren’s Method 26
   - Wintrobe’s Method 27
   - Discussion 28
   - Factors which Influence Erythrocyte Sedimentation Rate 28
   - Significance of Erythrocyte Sedimentation Rate in Disease 29
   - Physiological Variations 29
   - Pathological Variations 29
   - Factors Affecting Erythrocyte Sedimentation Rate 29
   - Result 29
   - Questions 30

8. **Experiment 8: Total Leukocyte Count**
   - Aim 31
   - Principle 31
   - Apparatus Required 31
   - Procedure 31
   - Precautions 32
   - Calculation 33
   - Discussion 33
   - Result 34
   - Questions 34
