Contents

1. Hazards in the Clinical Biochemistry Laboratory 1
   Hazards from Dangerous Chemicals  1
   Infection Hazard  2
   First-Aid and Emergency Treatment in the Laboratory  4

2. Specimen Collection and Preservation 7
   Taking Care of the Intra- and Extra-laboratory Factors for Reliable Results  7
   Collection and Preservation of Biological Fluids  9
   Method of Taking Blood Specimen and Separating the Serum Aseptically  9
   Precautions for Taking Blood Sample  10
   Anticoagulants Used in Biochemical Analysis  11
   Preservation, Storage and Transport of Blood Sample  13

3. Quality Control in Clinical Laboratory 19
   To Assess the Validity of Results on Patient Specimens  19
   Type of Material Used for Quality Control  19
   Evaluation of QC Results  20
   Target Average Value of Quality Control Pool 20
   Temporary Target Average and Final Target Average  21
   Frequency of Analysis of Quality Control Sample  21
   Calibration and Calibration Materials  24

4. Units and Reference Values 30

5. Review of Analytical Chemistry 38
   Concentration  38
   Dilution Problems  39
   Plasma Osmolality  39

6. Determination of pH 42
   pH and Significance  42
   Buffers  42
   Operation of pH Meter  43

7. Tests for Carbohydrates 45
   Test for Carbohydrates  45
   Reaction of Disaccharides  48
   Reactions of Polysaccharides  48
   Scheme for Identification of Unknown Carbohydrates  50

8. Precipitation Reactions for Proteins 52
   Precipitation by Salts  52
   Isoelectric Precipitation  53
   Precipitation by Organic Solvents  53
   Precipitation by Acidic Agents  53
   Precipitation by Heavy Metal Ions  53
   Precipitation by Heat and Acid  53

9. Color Reactions for Proteins 55
   General Reactions of Proteins  56
   Scheme for Identification of an Unknown Protein  59
# 10. Tests for Lipids
- Qualitative Tests of Lipids 60
- Test for Unsaturation (Bromination Test) 61
- Qualitative Tests for Glycerol 61
- Qualitative Tests of Cholesterol 62

# 11. Gastric Juice Analysis
- Qualitative Analysis of Gastric Juice 63
- Determination of Free and Total Acidity 64
- Interpretation 65

# 12. Physical Examination of Urine
- Specimen Collection and Preservation 67
- Composition of Normal Urine 68
- Physical Examination of Urine 68

# 13. Chemistry of Normal Urine
- Tests for Inorganic Constituents 71
- Tests for Organic Constituents 72

# 14. Abnormal Constituents of Urine
- Abnormal Constituents of Urine 73

# 15. Urinary Ascorbic Acid
- Ascorbic Acid Saturation Test 81
- Determination of Ascorbate by Titration with 2,6-Dichlorophenolindophenol 82

# 16. Urinary Reducing Sugars
- Benedict's Method for Urinary Reducing Sugars 84

# 17. Hemoglobin and its Derivatives
- Detection of Hemoglobin and its Derivatives 88
- Spectroscopic Study of the Pigments 88
- Preparation of Hemin Crystals 90
- Quantitative Determination of Hemoglobin 90
- Hemoglobin and Related Chromoprotein 91

# 18. Spectral Techniques
- Absorption Spectroscopy 94
- Standard Curve (Calibration Curve) 96
- Type of Instruments 96
- Essential Parts of Photo-colorimeter 97

# 19. Automation
- Classification of Analyzers 102
- Profiles of Analyzers 103
- Benefits of Analyzers 106

# 20. Liver Function Tests
- Excretion 107
- Intermediary Metabolism 107
- Serum Enzymes in Liver Diseases and Jaundice 107
- Synthesis 108
- Detoxification 108
- Hepatitis Markers 109
- Hepatitis A Virus (HAV) 110
- Hepatitis B Virus (HBV) 110
Hepatitis Be Antigen (HBeAg) 111
Antibodies to Hepatitis Be Antigen (Anti-HBe) 111
Antibody to Hepatitis B Core Antigen (Anti-HBc) 111
Hepatitis B Virus-DNA (HBV-DNA) 111
Hepatitis C Virus (HCV) 111
Hepatitis D Virus (HDV) 112
Hepatitis Delta Antibody (Anti-HDV) 112
Hepatitis E Virus 112

21. Cardiac Function Tests  116
   Test for Coronary Heart Disease Risk Evaluation  116
   Diagnostic Indicator of Myocardial Infarction  117

22. Kidney Function Tests  130
   Tests of Glomerular Function  130
   Tests of Tubular Function  131

23. Pancreatic Function Tests  138
   Functions of the Pancreas  138
   Tests in Pancreatic Diseases  139

24. Thyroid Function Tests  145
   Current Methods for Measuring Thyroid Related Hormones  145
   Enzyme Immunoassay for the Quantitative Determination of Thyrotropin (TSH) and Total T4 and T3  146
   Assessment of Thyroid Function and Interpretation  146

25. Tumor Markers  151
   Overview of Role of Laboratory Tests  151
   Classes of Biochemical Used as Tumor Markers  152
   Types of Analytes Used  152
   Other Proteins  154
   Methodology Used for Tumor Markers  156

26. Serum Total Proteins and Albumin–Globulin Ratio  159
   Serum Proteins Investigation  159
   Serum Protein Estimation by Biuret Method  159
   Determination of Albumin–Globulin Ratio  160

27. Serum Alkaline and Acid Phosphatase  168
   Alkaline Phosphatase  168
   Serum Alkaline Phosphatase Estimation  168
   Photometric Determination of Alkaline Phosphatase  169
   Acid Phosphatase  170

28. Serum Aminotransferases (Transaminases)  174
   Determination of Aminotransferases  174

29. Serum Amylase  178
   a-Amylase  178
   Serum Amylase Estimation  178
   Reagents  178
   Amylase (CNPG3 Method)  179
   Increased Plasma Amylase  179
   Macroamylasemia  180
   Decreased Plasma Amylase  180
## 30. Serum Bilirubin
- Determination of Serum Bilirubin 181
- Determination of Total and Direct Bilirubin 182
- Determination of Serum Bilirubin by the Method of Jendrassik and Gorf 182
- Retention Jaundice (Unconjugated Hyperbilirubinemia) 183
- Regurgitation Jaundice 184
- Mixed Hyperbilirubinemia 184

## 31. Blood Urea and Urea Clearance
- Choice of the Sample 189
- Determination of Blood Urea 189
- Nonenzymatic Method (Diacetyl Monoxime Method, DAM Method) 190
- Urinary Urea 192

## 32. Serum Creatinine and Creatinine Clearance
- Determination of Serum Creatinine (Jaffe's Alkaline Picrate Method) 194
- Estimation of Creatinine (Jaffe's Reaction without Deproteinization, Kinetic Method) 195
- Creatinine Clearance 196

## 33. Serum Uric Acid
- Determination of Serum Urate (Caraway's Method) 199
- Determination of Urate in Urine 202

## 34. Blood Sugar
- Choice of Blood Specimen 204
- Glucose Oxidase Peroxidase Method 205
- Glucose Hexokinase Method 205
- Alkaline Copper Reduction Method 205
- Ferricyanide Method 207
- Classification of Hyperglycemia Disorders 208
- Causes of Insulin Resistance 209

## 35. Glucose Tolerance Test
- Oral Glucose Tolerance Test 217
- Extended Oral Glucose Tolerance Test (EGTT) 220
- Cortisone Stressed Glucose Tolerance Test 220
- Frequently Sampled Intravenous Glucose Tolerance Test (FSIGT) 220
- Factors Affecting GTT 220
- Some Special Tests for Diagnosis of Diabetes 221

## 36. Blood Lipids
- Ultracentrifugation and Electrophoresis 226
- Precautions for Taking Blood Samples for Lipid Analysis 226
- Cholesterol 227
- Nonenzymatic Method for Cholesterol Estimation 227
- Enzymatic Method for Cholesterol Estimation 228
- Determination of HDL Cholesterol 230
- Triglycerides 232

## 37. Serum Inorganic Phosphorus
- Phosphorus in Blood 247
- Determination of Inorganic Phosphate in Serum 247
- Phosphate Excretion 250

## 38. Serum Calcium
- Determination of Total Serum Calcium 251
- Estimation of Total Serum Calcium Dye O-Cresolphthalein Complexone (Colorimetric End-Point Method) 251
