SECTION 1: Gastroenterology

1. Developmental Anatomy and Physiology of the Digestive Tract ............................................................... 3
   Yogesh Waikar
   Applied developmental anatomy and physiology of esophagus 3
   Applied developmental anatomy and physiology of stomach 3
   Applied developmental anatomy and physiology of intestines 4
   Applied developmental anatomy of pancreas 5

2. Common Gastrointestinal Symptoms ........................................................................................................... 7
   Wafa’a Al-Qabandi
   Vomiting 7
   Diarrhea 14
   Abdominal pain 22
   Constipation 27
   Gastrointestinal bleeding 33
   Abdominal distension 42
   Failure to thrive 48

3. Disorders of the Esophagus ......................................................................................................................... 59
   SK Mittal
   Gastroesophageal reflux disease (GERD) 59
   Management of GERD 64
   Pharmacologic therapies 65
   Acquired esophageal stricture 69
   Esophageal achalasia 71

4. Neurogastroenterology and Motility Disorders .......................................................................................... 78
   Paolo Quitadamo, Efstratios Saliakellis, Osvaldo Borrelli, Nikhil Thapar
   Abdominal pain-related functional gastrointestinal disorders 78
   Functional constipation 81
   Chronic intestinal pseudo-obstruction 83
   Gastrointestinal and nutritional problems in neurologically impaired children 85
   Cyclical vomiting syndrome 87

5. Disorders of the Stomach and Small Intestine .......................................................................................... 93
   Ravinder Goyal, BR Thapa, Rimjhim Srivastava, Srikanth KP
   Congenital anomalies of the stomach 93
   Gastritis: H. pylori and peptic ulcer disease, and non-H. pylori ulcers 96
   Congenital anomalies of small intestine 101
6. **Acute Diarrhea** ..................................................................................................................................................... 111  
*AK Patwari*  
Epidemiology 111  
Etiology 111  
Pathogenesis 111  
Clinical features 112  
Principles of treatment 112

7. **Chronic and Persistent Diarrhea** ...................................................................................................................... 119  
*Sarah Paul, John Matthai*  
Chronic diarrhea 119  
Persistent diarrhea 122

8. **Celiac Disease**....................................................................................................................................................... 125  
*Bhupinder Sandhu, Nkem Onyeador*  
Definition 125  
Historical background 125  
Epidemiology 126  
Genetics 126  
Pathogenesis 127  
Clinical features and patterns of disease 127  
Investigations 128  
Screening for celiac disease 130  
Management of celiac disease 131  
Prognosis 132  
Complications of celiac disease 133  
Refractory celiac disease 133  
Future research 133  
Sources of patient/parent information 134

9. **Inflammatory Bowel Disease** ............................................................................................................................ 137  
*Boosha Vivatvakin, Palittiya Sintusek*  
Inflammatory bowel disease 137

10. **Disorders of the Pancreas** .................................................................................................................................. 147  
*A Riyaz*  
Congenital anomalies 147  
Genetic disorders 148  
Acute pancreatitis 149  
Chronic pancreatitis 154  
Tumors of pancreas 156

11. **Short Bowel Syndrome** ................................................................................................................................. 159  
*Olivier Goulet*  
Etiology and incidence 159  
Pathophysiology 163  
Management 166  
Long-term outcome and growth of patients 173
12. Surgical Disorders of the Gastrointestinal Tract ........................................................................................... 181
Rajeev Redkar, Parag Karkera

Congenital Anomalies 181
- Esophageal atresia and tracheoesophageal fistula 181
- Infantile hypertrophic pyloric stenosis 183
- Duodenal atresia 184
- Ileal and jejunal atresia 184
- Meconium ileus 185
- Malrotation of gut 186
- Abdominal wall defects (omphalocele and gastroschisis) 188
- Hirschsprung's disease 189
- Anorectal malformations 190

Acute Emergencies 193
- Appendicitis 193
- Intussusception 194
- Meckel's diverticulum 196
- Intestinal obstruction 197
- Inflammatory bowel disease 198

Rarer Issues and Recent Advances 199
- Annular pancreas 199
- Pancreas divisum 199
- Gastroesophageal reflux disease 199
- Bariatric surgery 200

SECTION 2: Nutrition

13. Nutritional Assessment in Health and Disease .............................................................................................. 207
K Vijayaraghavan
- Goals 207
- Guiding principles 207
- Methods of nutrition assessment 208
- Clinical examination 208
- Nutritional anthropometry 211
- Biochemical assessment 214
- Dietary assessment 216

14. Food Allergy ......................................................................................................................................................... 218
S Srinivas
- Terminology and definitions 218
- Incidence 218
- Immunological basis of food allergy 218
- Pathophysiology of food allergy 219
- Immunopathogenesis of food allergies 219
- Symptoms associated with food hypersensitivity 220
- Clinical phenotypes/reactions seen in food allergy 220
- Food allergy to specific foods 220
- Cow's milk allergy/cow's milk protein allergy (CMA/CMPA) 221
- Natural history of food allergy 221
- Descriptive case scenarios in food allergy 223
15. Childhood Malnutrition

Md Iqbal Hossain, Tahmeed Ahmed

Guidelines for the management of children with SAM 228
Community-based management of SAM 233
Micronutrient deficiencies in children 234
Iron deficiency 235
Vitamin A deficiency 236
Zinc deficiency 236
Iodine deficiency 237

16. Pediatric Enteral Nutrition

Sarath Gopalan

American Society of Parenteral and Enteral Nutrition recommendations 239
General principles of pediatric enteral nutrition 240
Indications for enteral nutrition 241
Pediatric enteral nutrition formulations 241
Enteral nutrition delivery—access techniques and devices 243
Complications associated with enteral feeding 246

17. Parenteral Nutrition

Mohammad Nurul Akhtar Hasan, Sandipan Sarkar, Garima Garg, Parvathi U Iyer

Preferred route of nutrient delivery 249
Total parenteral nutrition and partial parenteral nutrition 249
Route of administration 249
Indications for parenteral nutrition 250
Sources of energy 250
Carbohydrate requirement 251
Protein requirement 251
Total nutrient admixture (TNA) 256

18. Probiotics in Gastrointestinal Disorders

Juliet Sio Aguilar

Definitions 261
Mechanisms of action of probiotics 261
Strains with documented efficacy 262

SECTION 3: Hepatology

19. Anatomy, Development and Physiology of the Hepatobiliary System

Dhanasekhar Kesavelu

Functional anatomy: sectors and segments 273
Anatomy of the biliary tract and bile duct epithelial cells 274
Development of hepatic vasculature 274
Liver physiology including hepatocellular function 274
Hepatocyte death and regeneration 275

20. Approach to Common Liver: Symptoms and Signs

Siham Al Sinani

Jaundice 276
Pruritus 280
Hepatomegaly 282
Splenomegaly 284
21. Interpretation of Liver Function Tests ............................................................................................................. 294
   *BR Thapa, Ravinder Goyal, Srikanth KP*
   - Uses 294
   - Limitations 294
   - Classification of LFT 294
   - Tests of the liver's capacity to transport organic anions 294
   - Tests for hepatocytic necrosis 297
   - Tests of the liver's biosynthetic capacity 301

22. Neonatal Cholestasis ..........................................................................................................................................309
   *James Huang, Marion M Aw*
   - Etiopathogenesis of neonatal cholestasis 309
   - Approach to an infant with cholestasis 311
   - History 311
   - Physical examination 312
   - A diagnostic approach 312
   - General principles of management 316
   - Approach to the premature infant with cholestasis 316
   - Extrahepatic causes of cholestasis 317
   - Familial (inherited) causes of intrahepatic cholestasis 320

23. Acute Hepatitis ....................................................................................................................................................326
   *Ramaswamy Ganesh, Malathi Sathiyasekaran*
   - Etiology 326
   - Epidemiology 326
   - Etiopathogenesis 327
   - Atypical manifestations and complications of acute viral hepatitis 330
   - Differential diagnosis 331
   - Management of acute viral hepatitis 333
   - Treatment for acute hepatitis due to other nonhepatotropic viruses 334

24. Chronic Viral Hepatitis ........................................................................................................................................337
   *Neelam Mohan, Deepak Goyal*
   - Clinical features of chronic viral hepatitis 337
   - Hepatitis B 337
   - Hepatitis C 343

25. Autoimmune Hepatitis .......................................................................................................................................348
   *M Geetha*
   - Epidemiology 348
   - Genetics 348
   - Pathogenesis 349
   - Types 349
   - Clinical patterns of presentation 350
   - Natural history 351
   - Autoantibodies 351
   - Liver biopsy 353
   - Imaging 353
   - Diagnostic criteria 353
