Section 1: History and Basics of Catheterization

1. History of Transcatheter Interventions in Pediatric Cardiology
   P Syamasundar Rao
   - Transcatheter Occlusion of Cardiac Defects
   - Catheter-based Atrial Septostomy
   - Endovascular Stents
   - Other Transcatheter Interventions

2. History of Transcatheter Interventions in Adult Cardiology
   Chitra Narasimhan, IB Vijayalakshmi
   - Evolution of Diagnostic Angiography
   - Catheters
   - Evolution of Angioplasty
   - Stents
   - Diagnostic Modalities

3. Radiation Safety and Contrast Agents
   AC Nagamani
   - Radiation Safety during Cardiac Imaging Procedures
   - Radiation Terminology
   - Basic Radiation Safety Principles
   - Radiation Doses in Cardiac Imaging Procedures
   - Women and Fluoroscopic-Guided Procedures
   - Staff Tissue Reaction
   - Staff Cancer Risk
   - Intravascular Contrast Agents
   - Cardiac Effects

4. Preparation for Cardiac Catheterization
   Maria Yates, Duraisamy Balaguru
   - Patient Selection
   - Physician Preparation
   - Patient Preparation
   - Preparation of Catheterization Laboratory

5. Percutaneous Vascular Access for Cardiac Catheterization
   Tharanathara R Yarabolu, Prakash Balan, Duraisamy Balaguru
   - General Technique of Vascular Access
   - Venous Access
   - Arterial Access
   - Unusual Percutaneous Approaches
   - Hybrid Approaches

6. Hardware in Catheterization Laboratory
   SS Mishra, BR Mishra, SN Routray, AN Pattnaik, S Mishra
   - Vascular Sheath
   - Guide wires
   - Diagnostic and Coronary Guiding Catheter
   - Balloons
   - Stents
   - Coronary Snares
   - Hardware for Special Procedures
   - Embolic Protection Devices
   - Mechanical Thrombectomy
   - Rotational Atherectomy
   - Vascular Brachytherapy
   - Hemodynamic Support Device
   - Intervention for Valvular Heart Disease
   - Intervention for Congenital Heart Disease
   - Electrophysiological Study and Radiofrequency Ablation
   - Permanent Pacemakers and Devices

Section 2: Hemodynamics

7. Right and Left Heart Catheterization
   Ravi Math
   - Conduct of a Catheterization Study
   - Normal Waveforms and Relationship
   - Measurement of Cardiac Output, Resistance and Valve Area
   - Shunt Detection and Quantification
   - Practical Case
   - Errors
   - Angiograms
   - Common Views for Common Conditions
   - Complications

8. Cardiac Output and Vascular Resistance
   Srikanth Sola, Reeta Varyani
   - Cardiac Output
   - Vascular Resistance

9. Shunt Calculations
   Duraisamy Balaguru
   - Oximetry Method
   - Flow Calculations
   - Rapid Calculation of $Q_s/Q_o$ Ratio
   - Shunt Calculation in a Patient with Single Ventricle and Aortopulmonary Shunt
   - Shunt Calculations after Glenn Operation
   - Shunt Calculations during Pulmonary Vasoreactivity Testing
   - Vascular Resistance
10. Hemodynamic Pressure Traces Recordings

Kothandam Sivakumar

- Fluid-Filled Catheter Recordings 135
- Micromanometer Recordings 135
- Pressure Waveforms 135
- Potential Sources of Errors 136
- Atrial Pressure 136
- Ventricular Pressures 136
- Aortic Pressures 136
- Pulmonary Artery Pressures 140
- Hemodynamics in Valvar Lesions 140
- Postectopic Response 142
- Hemodynamics in Arrhythmias 143
- Shunt Lesions 144
- Constrictive Pericarditis and Restrictive Cardiomyopathy 146

Section 3: Interventional Techniques for Valvular Heart Diseases

11. Balloon Valvuloplasty for Pulmonary Stenosis

P Syamasundar Rao

- Pathology and Pathophysiology 149
- Clinical Features 149
- Noninvasive Evaluation 150
- Management 150
- Balloon Pulmonary Valvuloplasty 150
- Results including Complications 158
- Balloon Valvuloplasty in Specific Groups 160
- Other Issues 163

12. Balloon Valvuloplasty for Aortic Stenosis

IB Vijayalakshmi, Chitra Narasimhan

- Pathophysiology 175
- Evaluation of Aortic Stenosis for Intervention 176
- Echocardiographic Assessment of Aortic Stenosis 176
- Indications for Intervention 178
- Precatheterization Stabilization 178
- Procedure and Technical Considerations 182
- Types of Balloons Used for ABV 183
- Challenges and Complications 191

13. Percutaneous Balloon Valvuloplasty for Mitral Stenosis

Harikrishnan S, Sanjay G, Krishna Kumar M

- History of Percutaneous Mitral Valvuloplasty 198
- Management of Patients with Mitral Stenosis 199
- Interventional Treatment 200
- Mechanism of Percutaneous Balloon Mitral Valvotomy 200
- Indications and Contraindications for PMV 201
- Percutaneous Mitral Valvotomy: Special Considerations 201
- Evaluation and Patient Selection for PMV 202
- Echocardiographic Assessment in MS Prior to PMV 202
- Predictive Value of Echocardiographic Assessment of MV Morphology before PMV 203
- Transesophageal Echocardiography in PMV 203
- Preparation of the Patient (SCTIMST Protocol) 203
- Obtaining the Vascular Access 203
- Steps of Percutaneous Mitral Valvotomy 203
- Long-term Follow-up of Patients Undergoing PMV 208
- Factors affecting Long-term Prognosis after PMV 208
- Symptom Benefit following PMV 208
- Follow-up and Management of Patients after PMV 210
- Infective Endocarditis Prophylaxis 210
- PMV in Pregnancy 211
- PMV in Juvenile MS 212
- Left Atrial Thrombus in MS 212

14. Percutaneous Balloon Valvuloplasty for Tricuspid Valve Stenosis

Ramesh Arora

- Clinical Features 216
- Management 217
- Balloon Valvuloplasty 217
- Surgical Treatment 221

Section 4: Interventional Techniques for Shunt Lesions

15. Transcatheter Closure of Atrial Septal Defects

Hussam Suradi, Ziyad M Hijazi

- Proper Patient Selection for Transcatheter Closure of Secundum ASD 225
- Imaging to Guide ASD Closure 226
- Transcatheter Device Closure With 2D-TEE 227
- Intracardiac Echocardiography 227
- Devices Description 233
- Other Devices 237
- Closure Technique 239
- Complex ASDs 244
- Postprocedural Care and Results 253
- Troubleshooting and Complications 254

16. Transcatheter Closure of Patent Foramen Ovale

Hussam Suradi, Ziyad M Hijazi

- Anatomical Considerations for the Interventionalist 260
- Diagnosis of PFO 261
- Clinical Implications 262
- Indications for PFO Closure 263
- Implantation Technique 266
- Device Selection Based on Anatomic Features 270
- Postprocedural Care 272
- Postprocedure Complications 272
17. Device Closure of Ventricular Septal Defect 275
Eiméar McGovern, Kevin Walsh, IB Vijayalakshmi, Barry O'Callaghan

• Devices 276 • Recommendations 281 • Patient Selection 281 • Procedure 283
  • Approach 284 • Using the ADO II Device 290 • Complications 296 • Follow-up 297

18. Interventions in Patent Ductus Arteriosus 301
IB Vijayalakshmi

• Indications 302 • Selection of Patients and Preprocedural Assessment 302 • Angiographic Evaluation of Patent Ductus Arteriosus 302 • Selection of Device 303 • Preprocedure 304 • Ductal Spasm 306 • Coil Closure of Patent Ductus Arteriosus 306 • Device Closure of Patent Ductus Arteriosus 313 • Special Situations 314 • Amplatzer Duct Occluder II 322
  • Amplatzer Duct Occluder II Additional Size 323 • Amplatzer Vascular Plug 325 • Amplatzer Vascular Plug IV 326
  • Infective Endarteritis 326 • Residual Shunts 326 • Complications 326 • Complications and Management 327

19. Device Closure of Coronary Cameral Fistula 333
Gareth J Morgan, Shakeel Qureshi

• Definition, Pathophysiology and Natural History 333 • Diagnosis and Investigation 335 • Management Strategies 335 • Interventional Catheterization 335

20. Closure of Unusual Defects: Tunnels and Leaks 339
Kothandam Sivakumar, IB Vijayalakshmi

• Aortico-right Atrial Tunnel 339 • Pulmonary Artery to Right Atrial Tunnel 341 • Aortico-left Ventricular Tunnel 343 • Aortico-right Ventricular Tunnel 346 • Fontan Fenestrations 347 • Senning Baffle Leak Closure 349 • Anomalous Systemic Arterial Blood Supply to Lungs 351 • Blalock-Taussig Shunts 351 • Ruptured Sinus of Valsalva Aneurysm 352 • Potts Shunt 353 • Venovenous Collaterals 354 • Aortopulmonary Collateral Vessels 354 • Right Pulmonary Artery to Left Atrial Window 356 • Pulmonary Arteriovenous Fistula 357

21. Patent Ductus Arteriosus Stenting in Cyanotic Congenital Heart Disease with Duct-dependent Pulmonary Circulation 362
Leong M Chern, Mazeni Alwi

PDA Stenting: Early Human Experience 362 • Patent Ductus Arteriosus Morphology 362 • Exclusion Criteria 367 • Technique 368 • Potential Complications 374 • Durability of Palliation with PDA Stenting 376

Section 5: Interventional Techniques for Fetus and Neonates

22. Intrauterine Cardiac Interventions 381
Carlos AC Pedra, Simone Fontes Pedra, C Fabio Peralta

Clinical Indications 381 • Procedural Aspects 383 • Outcomes 385 • Ethical Aspects and Conclusion 386

23. Neonatal Catheter Interventions 388
P Syamasundar Rao

Catheter-Based Atrial Septostomy 388 • Balloon Dilatation (Balloon Valvuloplasty/Balloon Angioplasty) 396 • Radiofrequency Perforation of Atretic Pulmonary Valve 409 • Transcatheter Occlusion of Shunt Lesions 412 • Stents 415

Section 6: Interventions in Vessels

24. Percutaneous Management of Aortic Coarctation 433
P Syamasundar Rao

Balloon Angioplasty of Native Coarctation of the Aorta 434 • Applicability of Balloon Angioplasty to Other Stenotic Lesions of the Aorta 450 • Balloon Angioplasty of Postsurgical Recoarctation 451 • Stents in the Management of Aortic Coarctation 454 • Covered Stents 460 • Comparison of Different Types of Treatment of Aortic Coarctation 460 • Selection of Method of Intervention 461 • Future Directions 461

25. Catheter Interventions for Pulmonary Artery Stenosis 472
R Suresh Kumar, R Saileela

Causes 472 • Clinical Features 472 • Investigations 472 • Indications for Interventions 473 • Management 474 • Complications 477 • Follow-up 477

26. Peripheral Vascular Intervention 479
R Ravikumar

Who are at Risk for Peripheral Arterial Disease? 479 • Ankle-Brachial Index 480 • Segmental Limb Pressures 481 • Pulse Volume Recordings 482 • Duplex Ultrasound/Color Doppler Imaging 482 • Magnetic Resonance Angiography 483
27. Interventions in Superior and Inferior Vena Cava  495
   Biswajit Bandyopadhyay, Indira Banerjee
   Superior Vena Cava Interventions  495  •  Inferior Vena Cava Interventions  498

28. Endovascular Management of Inferior Vena Cava and Central Venous Obstruction  501
   BC Srinivas, CM Naghash, Babu Reddy, Dattatreya PV, CN Manjunath
   Endovascular Management of IVC and Hepatic Venous Obstruction  501  •  Endovascular Management of
   Central Venous Occlusion in Chronic Renal Failure  511

29. Carotid Artery Interventions  517
   Atul Mathur, Amit Kumar
   Pathology and Pathophysiology  517  •  Natural History and Risk Stratification  517  •  Anatomy  517  •  Clinical
   Assessment  518  •  Noninvasive Testing  518  •  Decision Making in Carotid Revascularization  519  •  Procedural
   Considerations  519  •  Special Considerations  522  •  Postprocedural Management  526  •  Potential Complications  526

30. Interventions for Renal Artery Stenosis  530
   Girish B Ramteke
   Renovascular Disease and Renal Artery Stenosis  530  •  Diagnosis of Renovascular Disease  530  •  Treatment of Renal Artery
   Stenosis  532  •  Renal Angiography  532  •  Percutaneous Transluminal Renal Angioplasty and Stenting  534  •  Complications  538
   •  Role of Embolic-Protection Devices  538  •  Postprocedure  538  •  Clinical Outcomes  538  •  Current Opinions on the Patient
   Selection for PTRA/Stenting  539

31. Challenges of Interventions in Takayasu’s Arteritis  543
   J Ezhilan
   Challenges in Diagnosis  544  •  Challenges in Disease Monitoring  544  •  Management of Takayasu’s Arteritis  544

32. Interventions in Deep Vein Thrombosis and Pulmonary Thromboembolism  550
   Muralikrishna Nekkanti, Karthikeyan Sivagnanam
   Objectives in Treatment of Deep Vein Thrombosis  550  •  Interventions in Deep Vein Thrombosis  550  •  Interventions in Pulmonary
   Embolism  559  •  Thrombolytic Therapy for Pulmonary Embolism  560  •  Thrombolytic Therapy for Deep Vein Thrombosis  561

33. Transcatheter Management of Congenital and Acquired Pulmonary Vein Stenosis in Children and Adults  564
   Srinath T Gowda, Henri Justina, Athar M Qureshi
   Patient Selection and Preprocedural Planning  564  •  Catheterization Technique and Outcome in Children  565
   •  Transcatheter Treatment of Primary and Acquired Pulmonary Vein Stenosis in Adults  568  •  Complications  571  •  Follow-up  571

34. Stents in the Management of Vascular Obstructive Lesions Associated with Congenital Heart Disease  573
   P Syamasundar Rao
   Historical Aspects  573  •  Types of Stents  573  •  Method of Implantation  575  •  Branch Pulmonary Artery Stenosis  577
   •  Coarctation of the Aorta  580  •  Right Ventricular Outflow Conduits  581  •  Percutaneous Replacement of Pulmonary Valve  583
   •  Stents for Native Right  •  Ventricular Outflow Tracts in Tetralogy of Fallot Patients  583  •  Occluded/Obstructed Surgical
   Shunts  584  •  Systemic Veins  584  •  Pulmonary Veins  587  •  Other Sites  588  •  Future Directions  590

35. Coronary Angiography  599
   Geetha Subramanian, Srinivasan Narayanan, J Ezhilan, Gnanavelu Ganesan, Cecily Mary Majella
   Indications for Coronary Angiography  599  •  Contraindications for Coronary Angiography  601  •  Preparation for Coronary
   Angiography  601  •  Vascular Access  602  •  Engaging the Coronary Arteries  602  •  Technique of Coronary Arteriography  603
   •  Reading Coronary Arteriograms  609  •  Complications of Coronary Arteriography  609  •  Pitfalls of Coronary Arteriography  609

36. Basics of Percutaneous Coronary Intervention  612
   Rajiv Bajaj
   Basic Technique  612  •  Basic Imaging  613  •  Hardware  614  •  Reuse of Hardware  616  •  Complications  617
   •  Trial-based Guidelines  617
37. Transcatheter Treatment of Non-ST-elevation and ST-elevation Myocardial Infarction  618
   Dev B Pahlajani, Akshay Mehta
   Transcatheter Treatment of Non-ST-Elevation Acute Myocardial Infarction  619
   Transcatheter Treatment of ST-elevation Acute Myocardial Infarction  627

38. Coronary Stents  643
   Rajiv Bajaj
   Mechanism  643
   • Types of Stents  644
   • Deployment  645
   • Stent Retrieval  647
   • Stent Thrombosis  647
   • In-stent Restenosis  648
   • Stent Fractures  648
   • Follow-up  648

39. Bifurcation Stenting  650
   Sundeep Mishra
   How is Bifurcation Stenting Different from a Regular Stenting?  650
   • Classifications  650
   • Clinical Evaluation of Bifurcation Lesions  651
   • Decision-Making Process  652
   • Need for Physiologic Assessment: Role of Fractional Flow Reserve  653
   • Strategies for Bifurcation Stenting  654
   • PCI Optimization in Bifurcation Lesions  655
   • Other Modalities and Future Therapies for Infant Size Modification and Myocardial Regeneration  656

40. Primary Coronary Angioplasty in Acute Myocardial Infarction  670
   Vineet Bhatia, Upendra Kaul
   Historical Overview  670
   • Primary Percutaneous Intervention Versus Fibrinolysis  671
   • Technical Aspects of Primary PCI  673
   • Mechanical Adjunctive Devices for Primary PCI  675
   • Drug Eluting Stents in Patients with STEMI  676
   • Other Modalities to Prevent No Reflow  677
   • Adjunctive Pharmacological Therapies to Improve Myocardial Tissue Perfusion  678
   • Hemodynamic Support for Shock in STEMI  678
   • Other Modalities and Future Therapies for Infarct Size Modification and Myocardial Regeneration  679

41. Percutaneous Coronary Intervention in Chronic Total Occlusion  683
   AB Mehta, Vivek Mandurke, Nihar Mehta
   Improvement in Quality of Life  683
   • Impact on Mortality  684
   • Appropriate Use Criteria  684
   • Procedural Planning  684
   • Diagnostic Angiography  685
   • Decision-Making Process  685
   • PCI Optimization in Chronic Total Occlusion  686
   • Coronary Wires  686
   • Basics of Anterograde Wiring  687
   • After-Wire Crossing  690
   • Retrograde Approach  692
   • When to Stop  697
   • Recent Trends  697
   • Complication in CTO-PCI  697
   • Benefit with DES  698

42. Left Main Coronary Artery Interventions  701
   Aditya Kapoor
   Definition and Anatomy  701
   • Percutaneous Coronary Intervention for Left Main Coronary Artery Disease  702
   • General Principles of Left Main Percutaneous Coronary Intervention  706
   • Planned Versus Provisional Bifurcation Stenting  706
   • Guidelines  709

43. Percutaneous Intervention of Calcific Coronary Stenosis  713
   Santhosh KG Koshy, Nagendra Chouhan, Anil Dhall
   Pathophysiological Mechanism of Balloon Angioplasty  713
   • Challenges for Percutaneous Coronary Intervention in Calcified Coronaries  713
   • Techniques in Percutaneous Intervention of Calcific Coronary Stenosis  714
   • Limitations of Percutaneous Intervention of Calcific Coronary Stenosis  719
   • Future Prospects  719

44. Percutaneous Coronary Intervention for Saphenous Vein Grafts  722
   Geetha Subramanian, Gnanavelu Ganesan, Venkatesan Sangareddi, Cecily Mary Majella
   Predictors of Vein Graft Occlusion  722
   • Gold Standard for Assessment of Saphenous Vein Grafts  723
   • Why is Saphenous Vein Graft Intervention Challenging?  723
   • Pharmacological and Mechanical Strategies to Minimize Complications During Saphenous Vein Graft Intervention  723
   • Stenting for Focal Saphenous Vein Bypass Lesion versus Balloon Angioplasty  724
   • Role of Covered Stents versus Bare-Metal Stent in Saphenous Vein Graft Intervention  725
   • Bare-Metal Stent versus Drug-Eluting Stent in Saphenous Vein Graft Intervention  725
   • Embolic Protection Devices  725
   • Situations Posing Difficulty in Using Embolic Protection Device in Saphenous Vein Graft Percutaneous Coronary Intervention  727
   • Steps to Convert Challenge into Success in Saphenous Vein Graft Intervention  727

45. Interventions in Cardiogenic Shock  730
   CG Bahuleyan, Shifas Babu M
   Cardiogenic Shock Complicating Acute Myocardial Infarction  730
   • Unprotected Left Main Stem Occlusion With STEMI and Cardiogenic Shock  732
   • STEMI: Cardiac Arrest and Cardiogenic Shock  734
   • Cardiogenic Shock: Multivessel Disease  735
   • Assist Devices in Cardiogenic Shock: Role of Interventionist  735
   • Intra-aortic Balloon Pump  736
   • Percutaneous Extracorporeal Membrane Oxygenation  737
   • Percutaneous Ventricular Assist Devices: Impella and TandemHeart  737
Section 8: Imaging

46. Computed Tomography Angiogram in Cardiovascular Practice 743
   Madhav Hegde
   Technique and Indications 743 • Coronary Arteries 745 • Pulmonary Arteries 748 • Aorta 752 • Aneurysms 752
   • Trauma 757 • Mass Lesions 757 • Congenital Anomalies 760 • Postprocedural Assessment 767 • Venous System 767

47. Role of Nuclear Medicine in Coronary Artery Disease 772
   KG Kallur
   Radiopharmaceuticals 772 • Indication Category 773 • Imaging Technique 773

48. Advanced Coronary Artery Imaging Modalities 781
   Shikhar Agarwal, Ravi Nair
   Intravascular Ultrasound 781 • Clinical Applications 788 • Optical Coherence Tomography 790 • Near-Infrared Spectroscopy 796

49. Imaging for Interventions in Structural Heart Disease 803
   Joseph J Vettukattil, Harikrishnan KN
   Closure of Interatrial Communications 803 • Percutaneous Intervention in Valvular Heart Diseases 809
   • Ablation Procedures 813 • Periprocedural Imaging in Other Congenital Heart Defects 813

Section 9: Recent Techniques in Valvular and Aortic Diseases

50. Transcatheter Aortic Valve Implantation 819
   Praveen Chandra, Tarun Kumar, Vijaya Chaitanya, Nagendra Chouhan, Neeraj Gupta
   Patient Selection 819 • Assessment of Severity of Aortic Stenosis 819 • Assessment of Concomitant Coronary Artery Disease 820
   • Valve Type and Size Selection 820 • Assessment of Aortic Annulus 820 • Assessment of Cardiac Anatomy 821 • Assessment
   of Peripheral Arterial System 822 • Delivery System 825 • Indications for Pacing 826 • Complications and Management 826
   • Transcatheter Approaches to Treat Failing Prosthetic Valves (Valve-in-Valve Strategy) 827 • New Horizons 828 • Newer Studies 828

51. Percutaneous Treatment of Mitral Regurgitation 832
   Ganesh Athappan, Tilak Pasala, Samir R Kapadia
   Mitral Valve Disease 832 • Mechanisms of Mitral Regurgitation 833 • Natural History of Mitral Regurgitation 834 • Severity
   of Mitral Regurgitation 836 • Timing of Intervention 838 • Corrective Interventions for Mitral Regurgitation 838 • Degenerative
   Mitral 839 • Regurgitation 839 • Functional/Ischemic Mitral Regurgitation 844 • Transcatheter Mitral Valve Implantation 847

52. Left Atrial Appendage Closure 852
   Sameer Gafoor, Jennifer Franke, Stefan Bertog, Laura Vaskelyte, Ilona Hofmann, Horst Sievert
   Closure Devices 852 • Data 853 • Selection Criteria 854 • Procedural Technique 854 • Complications 858 • Follow-up 858

53. Percutaneous Pulmonic Valve Implantation 860
   Hussam Suradi, Ziyad M Hijazi
   Procedural Evolution 860 • Indications and Patient Selection 861 • Current Technologies 862 • Procedural and Technical
   Considerations 863 • Postprocedural Care 864 • Hemodynamic and Clinical Outcomes 865 • Complications 867
   • The Future 868

54. Transcatheter Closure of Paravalvar Leaks 870
   Kothandam Sivakumar
   Survival Advantage of Closing Paravalvar Leak 870 • Treatment Options of Paravalvar Leak 870 • Imaging Modalities 871
   • Fluoroscopic Profiling of the Leak 871 • Sizing the Paravalvar Leak 871 • Crossing a Paravalvar Leak with Guidewire 871
   • Prosthesis Lumen should not be Crossed with the Wire 872 • Choice of Devices Available for Paravalvar Leak Closure 872
   • Hybrid Surgical Approaches 873 • Closure of the Transapical Access 873

55. Endovascular Management of Aortic Aneurysm and Dissection 876
   Rajendra Kumar Jain, Tammi Raju, Anil Dhall
   Definitions of Aortic Aneurysm 876 • Anatomy and Etiopathogenesis 876 • Epidemiology 877 • History of Endografts 877
   • Open Surgical Versus Endovascular Repair 878 • Indications for Repair 879 • Anatomic Considerations 879 • Indications
   for Thoracic Endovascular Aortic Repair 882 • Stent-graft Design 882 • Advanced Devices and Techniques 884 • EVAR
   Randomized Trials 884 • Preoperative Risk Assessment 886 • Post Procedure Device Migration 889 • Endovascular Repair
   of the Thoracic Aorta 890 • Planning TEVAR 890 • Thoracic Endografts 891 • Preoperative Preparation 891 • Endograft
   Placement 891 • Perioperative Morbidity and Mortality 892 • Endovascular Therapy of Aortic Dissection 892 • Outcome and
   Complications 895 • Long-term Management 895

66. Alcohol Septal Ablation for Obstructive Hypertrophic Cardiomyopathy 1031
B Ramesh
Indications for Alcohol Septal Ablation 1031 • Procedural Details 1032 • Structural Remodeling and Hemodynamic Effects of Alcohol Septal Ablation 1035 • Treatment Efficacy 1035 • Potential Complications after Alcohol Septal Ablation 1035 • Comparison to Septal Myectomy 1036 • Our Experience at SJICR, Bengaluru 1037

67. Anesthesia for Pediatric Cardiac Catheterization and Intervention 1040
Muralidhar K
General Concerns in Catheterization Laboratory 1040 • Anesthetic Considerations 1042

68. Intra-aortic Balloon Pump 1047
Muralidhar K
Insertion of IABP 1048 • Timing for Balloon Inflation 1049 • Weaning IABP 1052 • IABP Balloon Sizing 1053 • IABP Triggers 1053 • Steps to Set-up the IABP to Commence Counterpulsation 1053 • Complications of IABP 1054

69. Pediatric Endomyocardial Biopsy 1055
Toby A Rockefeller, David T Balzer
Equipment/Technique 1057 • Risks/Complications 1060

70. Left Ventricular Assist Devices in Heart Failure: Current Status 1063
Bagirath Raghuraman, Vashisth Das, Keshav Prabhu
Ventricular Assist Devices 1063 • Classification of Cardiocirculatory Devices 1064 • Types of Ventricular Assist Devices Currently in Use 1066 • Left Ventricular Assist Devices Under Development 1068 • Indications for Mechanical Circulatory Support 1069 • Summary of the Typical Uses of More Investigated Devices in the Current Era 1069 • MCS: Recommendations (ACCF/AHA 2013 Guidelines for the Management of Heart Failure) 1069 • Survival 1070 • Scheme for Selection of Patients with Acute Cardiac Disease or CHF for Implantation of LVADS 1070 • Identifying the High-Risk Heart Failure Patient 1070 • Assessment of Disease Severity 1070 • Summary of Research of LVAD Support on Clinical Effects and the Cellular and Molecular Changes that may Contribute to Reverse Remodeling 1073 • Ventricular Assist Device-Associated Complications 1074 • Cardiopulmonary Resuscitation in Patients with VAD 1075 • Regulatory Issues with Mechanical Circulatory Support (USA) 1076 • Future 1076

71. Recanalization of Occluded Vessels (Including Thrombectomy) in Children and Adults with Congenital Heart Disease 1078
Athar M Qureshi, Henri Justino
Patient Selection and Preprocedural Planning 1078 • Vascular Access 1078 • Techniques of Crossing the Occluded Segment and Maintaining Position 1079 • Thrombectomy 1080 • Balloon Angioplasty/Stent Placement 1081 • Planning for Potential Complications 1081 • Follow-up 1082

72. Contrast-induced Acute Kidney Injury 1084
Geetha Subramanian, Gnanavelu Ganesan, Venkatesan Sangareddi, Cecily Mary Majella
Mechanisms by which Contrast Media Induces Nephropathy 1084 • Pathogenesis and Rationale of Preventive Measures 1085 • Incidence 1085 • Risk Factors 1086 • Reversibility and Prognosis 1087 • Prevention and Management 1087 • Renal Replacement Therapy 1090 • Other Drugs 1090 • Novel Biomarkers of Contrast-induced Acute Kidney Injury 1090 • Practical Considerations in Preventing Contrast-induced Acute Kidney Injury 1091
