CONTENTS

REFRACTIVE SURGERY WITH PHAKIC INTRAOCULAR LENSES

Jorge L. Alió, MD
Juan J. Pérez-Santonja, MD

Contributors iv
Foreword by George O. Waring, III, MD, FACS, FRCOphth. xi
Preface xiii
Acknowledgments xiv
Contents xv

PART I: BASIC PRINCIPLES OF REFRACTIVE SURGERY WITH PHAKIC IOLs.

1. BASIC PRINCIPLES OF REFRACTIVE SURGERY WITH PHAKIC IOLs.

1. Phakic Intraocular lenses - Where Are We Now?.
   1.1 Introduction. 5
   1.2 Angle-supported Anterior Chamber IOLs 5
   1.3 Iris-supported Lenses. 8
   1.4 Posterior Chamber Phakic IOLs 11

Herbert E. Kaufman, MD; Stephen C. Kaufman, MD.

2. The Limits of LASIK. Comparative Analysis between Corneal and Phakic IOL Refractive Surgery.
   2.1 Corneal Surgery for Myopia and Hyperopia: An Overview. 13
   2.2 The Limits of LASIK. 15
   2.3 Complications of LASIK. 18
   2.4 LASIK versus Phakic IOLs. 20

Antonio Marbino, MD; Maria Ceu Pinto, MD; Fernando Vaz, MD.

3. Refractive Surgery and Phakic IOLs.
   3.1 Surgical Correction of High Myopia and Hyperopia 25
   3.2 Phakic IOLs: Their Role in Refractive Surgery. 26
   3.3 Anatomical Location and Classification of Phakic IOLs. 27
   3.3.1 Angle-supported phakic IOLs. 28
   3.3.2 Iris-fixated phakic IOLs. 30
   3.3.3 Posterior chamber phakic IOLs. 31

Juan J. Pérez-Santonja, MD; Luca Antico, MD; Jorge L. Alió, MD.
4. Proper Patient Assessment, Selection and Preparation.
   4.1 Refractive Surgery Assessment
      4.1.1 General Ophthalmic Examination. 37
      4.1.2 Ultrasound Studies of the Eye
         4.1.2.1 Corneal pachymetry 42
         4.1.2.2 Biometry 42
         4.1.2.3 Ultrasound biomicroscopy 43
      4.1.3 Vitreoretinal Examination.
         4.1.3.1 Examination of the peripheral retina and vitreous 45
         4.1.3.2 Examination of the macula 45
      4.1.4 Sizing of Phakic IOLs.
         4.1.4.1 Angle-to-angle and sulcus-to-sulcus distance. 47
         4.1.4.2 Anterior Chamber Depth. 48
      4.1.5 Patient Education
         4.1.5.1 Interview with the patient 53
         4.1.5.2 Preoperative instructions 53
         4.1.5.3 Postoperative instructions 53

Alberto Artola, MD; Ignacio Jiménez-Alfaro, MD; José M. Ruiz-Moreno, MD;
Carlo F. Lovisolo, MD; Dan Z. Reinstein, MD.

PART II: IMPLANTATION OF PHAKIC INTRAOCULAR LENSES

2. IMPLANTATION OF PHAKIC INTRAOCULAR LENSES FOR MYOPIA CORRECTION

5. Power Calculation of Phakic IOLs
   5.1 Introduction. 63
   5.2 Calculation of IOL Power
      5.2.1 Essential optics needed to derive the formula 64
      5.2.2 Optical rationale for simplification 65
      5.2.3 Practical aspects of calculations 66
   5.3 Outcome Studies 67
   5.4 Discussion 68

Rob GL. Van der Heijde, PhD; Camille JR. Budo, MD.

   6.1 Background and Development 71
   6.2 Models of Iris-fixated Phakic IOLs. 71
   6.3 Patient Selection and Pre-operative Work-up 73
   6.4 Surgical Technique. 74
   6.5 Intraoperative Complications 78
   6.6 Results 79
   6.7 Postoperative Complications and their Management 80

Camille JR. Budo, MD; Monika Landesz, MD; Jan GF. Worst, MD.
7. Baikoff (ZB, ZB5M, NuVita) Angle-supported Phakic IOLs
   7.1 Background and Development 83
   7.2 Models of Angle-supported Phakic IOLs 84
   7.3 Proper Patient Selection and Preoperative Workup 85
      7.3.1 Patien selection 85
      7.3.2 Preoperative workup 88
   7.4 Surgical Technique 89
   7.5 Intraoperative Complications 89
   7.6 Postoperative Complications and their Management 89

   Maria T. Iradier, MD; Eva Moreno, MD; Jairo Hoyos-Chacón, MD.

8. ZSAL-4 and ZSAL-4/PLUS Angle-supported Phakic IOLs
   8.1 ZSAL-4 Angle-supported phakic IOL 95
      8.1.1 Background and Development 95
      8.1.2 Patient Selection Criteria and the Preoperative Work-up 96
      8.1.3 Choosing the Proper ZSAL-4 Phakic Lens: Length and Power 97
      8.1.4 Surgical Technique and Medication 98
      8.1.5 Clinical Results 99
      8.1.6 Complications 100
      8.1.7 ZSAL-4 Phakic IOL vs Baikoff-type Angle-supported Lenses. 101
   8.2 ZSAL-4/Plus Angle-supported Phakic IOL 104
      8.2.1 Background and Development 104
      8.2.2 Clinical Results 105

   Juan J. Pérez-Santonja, MD; José M. Ruiz-Moreno, MD; Jorge L. Alió, MD.

9. Phakic 6H Angle-supported Phakic IOL.
   9.1 Background and Development 109
   9.2 Proper Patient Selection and Preoperative Work-up 110
   9.3 Surgical Technique 112
   9.4 Intraoperative Complications 114
   9.5 Phakic 6H Configuration Results. 114
   9.6 Postoperative Complications and their Management. 116
   9.7 Review of the Clinical Complications in the Galin and Gould AC IOL Series. 116

   Herbert LGould, MD; Miles Galin, MD.

10. Foldable Phakic IOLs for Myopia.
   10.1 GBR/VIVARTE Angle-supported Foldable Phakic IOL.
      10.1.1 Background and Development 121
      10.1.2 Surgical Technique 122
      10.1.3 Clinical Results. 123
      10.1.4 Intraoperative Complications 124
      10.1.5 Postoperative Complications and their Management. 124

   Daniel Elías, MD; Andreu Coret, MD.
10.2 The Kelman DUET Angle-supported Phakic IOL
   10.2.1 Background and Development
     10.2.1.1 Risks of refractive surgery correction
     10.2.1.2 Posterior chamber phakic implants
     10.2.1.3 Anterior chamber phakic implants
     10.2.1.4 Successful anterior chamber phakic IOLs
     10.2.1.5 Design considerations
   10.2.2 Insertion Technique
   10.2.3 Clinical Results
   10.2.4 Complications

11. ICL Posterior Chamber Phakic Intraocular Lens.
   11.1 Historical Background
   11.2 Indications and Patient Selection.
     11.2.1 Patient selection
   11.3 Preparation of the Patient
   11.4 Surgical Technique
     11.4.1 The loading technique
     11.4.2 Forceps technique
     11.4.3 Retro-iris positioning
     11.4.4 Postoperative pharmacological regimen
   11.5 Results
   11.6 Intraoperative Complications
     11.6.1 Damage to the lens
     11.6.2 Upbent haptics
     11.6.3 Pupillary block
     11.6.4 Inverted lens
   11.7 Postoperative Complications
     11.7.1 Early complications
     11.7.2 Late complications
     11.7.3 Other complications
   11.8 Conclusions

12. PRL-Medennium Posterior Chamber Phakic Intraocular Lens.
   12.1 Background and Development
   12.2 Patient Selection
   12.3 PRL Power Calculation
   12.4 Surgical Technique
   12.5 Clinical Results
   12.6 Complications
   12.7 Other Applications
   12.8 Conclusion

Charles D. Kelman, MD.

Carlo F. Lovisolo, MD; Paolo M. Pesando, MD.

Dimitrii D. Dementiev, MD; Kenneth J. Hoffer, MD; Aleksandra Sonecka, MD.
3. IMPLANTATION OF PHAKIC INTRAOCULAR LENSES FOR HYPEROPIA CORRECTION

13. Phakic Intraocular Lenses for Hyperopia
   13.1 Limitations of Corneal Techniques in the Treatment of High Hyperopia 181
   13.2 Proper Patient Selection and Preoperative Work-up 181
   13.3 Types of Phakic Intraocular Lenses for Hyperopia 181
      13.3.1 Iris-fixated Phakic IOLs 181
         13.3.1.1 Surgical technique 182
         13.3.1.2 Clinical results 183
         13.3.1.3 Intraoperative and postoperative complications 184
         13.3.1.4 Conclusions 185
   13.3.2 Posterior Chamber Phakic IOLs for Hyperopia: ICL 185
      13.3.2.1 Introduction 185
      13.3.2.2 Patient selection and lens choice: the guidelines 186
      13.3.2.3 Power calculation 188
      13.3.2.4 Surgical technique 189
      13.3.2.5 Intraoperative complications 189
      13.3.2.6 Postoperative complications 189
      13.3.2.7 Results 191
      13.3.2.8 Conclusions 191
   13.4 New Perspectives in Phakic IOLs for Hyperopia 193

Jorge L. Alió, MD; Carlo F. Lovisolo, MD; Enrico Giacomotti, MD.

4. IMPLANTATION OF PHAKIC INTRAOCULAR LENSES FOR ASTIGMATISM CORRECTION

   14.1 Introduction 201
   14.2 The Artisan Toric Lens 201
   14.3 Surgical Technique 201
   14.4 Clinical Results 202
   14.5 Complications 203

Jorge L. Alió, MD; José I. Belda, MD; Ahmed Hassanein, MD.

5. PRESBYOPIA CORRECTION BY PHAKIC INTRAOCULAR LENSES.

15. GBR / VIVARTE Presbyopic Foldable Phakic IOL
   15.1 Background and Development 207
      15.1.1 Description of the angle-supported anterior chamber multifocal phakic lens 208
      15.1.2 Measurement of the Internal Diameter of the Anterior Chamber 209
   15.2 Surgical Technique 211
   15.3 Presbyopic Foldable Phakic IOL Preliminary Results 213
      15.3.1 The Concept 213
      15.3.2 Equipment and Methods 214
6. COMBINED AND ADDITIVE PROCEDURES WITH PHAKIC IOLs

16. Combined and Additive procedures with Phakic IOLs
   16.1 Biopics and Adjustable Refractive Surgery for Extreme Myopia: Phakic IOLs and LASIK. 221
   16.1.1 Introduction 221
   16.1.2 Patient Selection and Preoperative Evaluation. 222
   16.1.3 Surgical Technique 222
   16.1.4 Avoiding Complications 225
       16.1.4.1 ICL Complications and management 225
       16.1.4.2 LASIK complications and management 228
   16.1.5 Conclusions 231
16.2 LASIK after Phakic Intraocular Lenses. 231
   16.2.1 Background 231
   16.2.2 Patient Selection and Preoperative Evaluation 233
   16.2.3 Avoiding Complications During Surgery 234
   16.2.4 Intraoperative Complications and their Management 234
   16.2.5 Postoperative Complications and their Management 235

Roberto Zaldivar, MD; Susana Oscherow, MD; Virginia Piezzi, MD;
Gonzalo Muñoz, MD.

7:- NEW TRENDS IN REFRACTIVE SURGERY WITH PHAKIC IOLs.

   17.1 Introduction 241
   17.2 Anterior Chamber Phakic IOLs 241
   17.3 Posterior Chamber Phakic IOLs 243

Charles D. Kelman, MD.

APPENDIX

Survey of Peer Reviewed Literature on Phakic Intraocular Lenses 247

Henia Lichter, MD; Julio Narvaez, MD;
George Waring III, MD, FACS, FRCOphth.
