Essentials of Medical Pharmacology
by Tripathi

Salient Features

- Thoroughly revised and updated chapters including new drugs and latest treatment guidelines.
- A new chapter on ‘Nitric oxide and vasoactive peptide signal molecules; along with novel drugs that act by modifying action/turnover of these molecules.
- Eye catching drug classification charts which help create pictorial memory.
- Several new figures, charts, tables and highlight boxes.
- Focus on ‘evidence-based medicine’ by extensive reference to credible studies and endpoint trials.
- India-specific information on diseases, drugs and treatment guidelines, particularly for TB, leprosy, HIV-AIDS, malaria, kala-azar, etc.
- Therapeutic recommendations from eminent professional bodies and organizations.
- Full coverage of the revised competency-based Pharmacology curriculum of MCI for graduate medical students.

Pharmacological Classification of Drugs
With Doses and Preparations
by Tripathi

Salient Features

- The present user-friendly format of the booklet is intended to make it a better aid for remembering drug names, identifying the class and subclass to which they belong, and provide easy access to core prescribing information.
- Drugs classifications are presented in the form of hierarchically designed charts along with pictorial images for easy learning.
- All classifications have been updated, expanded and modified wherever necessary.
- Doses, frequency and route (s) of administration along with leading brand names of drugs and different types of dosage forms are listed after each class of drugs.
- New drugs, particularly those marketed recently, have been included.
- Single drug formulations are mainly mentioned.
- Combined drug formulations find a place wherever important or relevant.
- Synonyms and alternative names of drugs and classes of drugs are also mentioned.

Exam Preparatory Manual for Undergraduates Pharmacology by Udaykumar

Salient Features
- Exam oriented format.
- Simple language.
- Student-friendly presentation.
- New mind map concept introduced to assist visual memory.
- Simple figures.
- Self-explanatory flowcharts
- Compare-contrast series to improve depth.
- Mnemonics for better retention.
- Medical Council of India (MCI) syllabus covered.

Two Colour | Paperback | 1/e, 2020 | 6.75” × 9.5”
524 pp | 9789352709083

Salient Features
- Exam oriented format.

Practical Manual of Pharmacology for Medical Students by Badyal

Salient Features
- This book covers all essential components of pharmacology practicals which could contribute to improve therapeutics.
- Explains experimental pharmacology in relation to computer simulation modules.
- Describes pharmacokinetic parameters with formula and their clinical significance.
- Prescription writing is new format as per recent revision and drug interactions are in problem-based pattern.
- Includes principles of drugs used in special populations, pregnancy, lactation, hepatic and renal diseases.
- Discusses ethics for animal experiments as well as human clinical trials.
- Includes research component as students are doing short research studies.

Single Colour | Paperback | 2/e, 2018 | 6.75” × 9.5”
294 pp | 9789352702411

TAB 4 U A Concise Manual of Pharmacology by Antony A

Salient Features
- Provides learning fundamentals of pharmacology.
- Includes more than 100 mnemonics.
- Gives important classification charts separately.
- Contains chapterwise classifications, mechanism of action, use and side effects of each class.
- Students can master a large amount of information in a short period of time.
- Helps blooming doctors to strengthen their prescribing skills.

Single Colour | Paperback | 1/e, 2017 | 4.75” × 6”
240 pp | 9789352700264

Practical Pharmacology by Yadav, et al.

Salient Features
- Best book to prepare for practicals in pharmacology.
- Includes latest prescriptions.
- Addition of new flowcharts and tables to facilitate easy learning.
- Systematic presentation of information that is relevant from examination point of view.
- Helps the 2nd MBBS students to score high in practical pharmacology.

21 LINE DIAGRAMS & PHOTOGRAPHS

Learning Practical Pharmacology for Undergraduates by Sindhu

Salient Features
- Covers practicals in pharmacy and experimental pharmacology with due emphasis on therapeutics.
- Enlightened the reader on the science of preparing and dispensing drugs and their effect on living systems.
- Discusses important skills such as starting intravenous lines, test for penicillin hypersensitivity, dose calculations, clinical trials, etc.
- Contains generous amount of figures and illustrations.
- Question Bank given at the end of the book covering most frequently asked and must-know topics.

46 LINE DIAGRAMS & 33 PHOTOGRAPHS

Practical Manual of Experimental and Clinical Pharmacology by Medhi & Prakash

Salient Features
- New updated edition, well organized and structured keeping in mind the practical aspects in pharmacology.
- Each chapter begins with the basic principles and then discusses techniques of experimental and clinical pharmacology followed by practically important topics in pharmacology.
- Includes new prospects in history of pharmacology.
- Experimental and practical pharmacology added.
- All chapters include references for further reading.

200 LINE DIAGRAMS & 111 PHOTOGRAPHS

Textbook of Pharmacovigilance Ensuring the Safe Use of Medicine by Gupta & Srivastava

Salient Features
- Introduction to Pharmacovigilance—basic definitions, classifications, objectives and historical perspective of pharmacovigilance.
- Presents the revised and updated information about the various aspects of pharmacovigilance such as setting up of a pharmacovigilance centre, regulations in various countries, methods of pharmacovigilance, benefit-risk assessment, signal detection, post-marketing surveillance, etc.
- Inclusion of need-felt text on latest issues of pharmacovigilance, such as Pharmacoepidemiology and pharmacovigilance; Pharmacoeconomic burden of hospitalization due to adverse drug reactions; Vigilance systems for medical devices; and Data management in pharmacovigilance.

Drug Discovery and Clinical Research
by Gupta

Salient Features
• Thoroughly updated and revised text.
• Presents recent advances in the field of drug discovery, clinical research and pharmacovigilance.
• New chapters have been added on
  » Translational research
  » Preclinical in vitro screening assays to predict drug safety during drug development process
  » Regulations for conducting clinical trials in India
  » Regulations for the development and clinical trials of biosimilars
  » Systematic review and meta-analysis
  » Basic principles of pharmaeconomics and outcomes research
  » Pharmacovigilance: Safety monitoring of drugs

Essentials of Pharmacovigilance
by Baweja

Salient Features
• A unique blend of basic and fundamental aspects of pharmacovigilance.
• Contains a dedicated chapter of 100 Case Studies with answers for hand-on training and experience in Pharmacovigilance practices.
• Key points are given in the initial page of every chapter.
• Sample Model Papers comprising of MCQs, Case Study, Long and Short Answer Questions, References for further reading have been given at the end of the book to prepare students for exams.
• Enriched with lots of flowcharts, tables and line diagrams for making learning easy and interesting. Also includes exhaustive appendices.
• Includes a glossary of terminologies used throughout the text in the beginning of the book along with useful abbreviations.

Practical Pharmacology
for Undergraduates with MCQs
by Mukhopadhyay

Salient Features
• The book covers the different undergraduate practicals of medical pharmacology in various Indian universities and medical colleges of Nepal.
• New practicals including charts, prescription criticism, some drug delivery system devices, etc are included as per the revised syllabus of Pharmacology.
• MCQs are given at the end to help students judge their standing on the subject and also useful for postgraduate entrance aspirants.

Methods in Drug Evaluation
by Tiwari

Salient Features
• Primarily meant to help the undergraduate and postgraduate students in Medicine and Pharmacy to face the practical examination of Pharmacology.
• Covers the important methods in drug development and drug screening, such as bioassay and various models of diseases which are usually asked in the MBBS and Pharmacy examination.

Textbook of Pathology
by Harsh Mohan

Salient Features

- The revised edition contains 30 chapters distributed in three sections: General Pathology (Ch. 1 to 10), Haematopoietic and Lymphoreticular System (Ch. 11 to 14), and Systemic Pathology (Ch. 15 to 30), and three appendices.
- Addition of new chapters, such as Molecular Cell Biology in Health and Ageing; White Blood Cells-Proliferations and Myeloid Neoplasms; and Diseases of Lymphoid Cells and Lymphoreticular Tissues.
- Schematic, gross images and photomicrographs have been added of high quality and better resolution, contributed generously by Prof Ivan Damjanov.
- ‘Must-know’ Boxes have been added summarising bulleted key points for a rapid revision.
- Chapter Orientation provided at the beginning of every chapter.
- Newer Format of Clinical Cases added at the end of most of the chapter.
- Important review questions have been added at the end of every chapter.
- Free Pathology Quick Review companion book, now with newer MCQs, and short-answer questions which are commonly asked in viva-vice examination.

Exam Preparatory Manual for Undergraduates
Pathology
by Nayak & Nayak

Salient Features

- Incorporated competency-based undergraduate curriculum for the as per Medical Council of India (MCI).
- Core competencies (CC) and non-core competencies (NC) are highlighted.
- Provides basic concepts of diseases required to be known by undergraduate students.
- Two new chapters on Basic Diagnostic Cytology, and Blood Banking and Transfusion are added in this addition.
- Rapid review of book is assisted with key points in bold words to brush through the entire book within a few hours.
- Provided with usual questions asked in the theory examination. Clinical-oriented cases, clinical scenario and interpretation of common urinary abnormalities, cerebrospinal fluid changes and liver function tests are added in this edition. Frequently asked questions are given in red colored font.
- Appendices provide various important bodies and its associated conditions, important cells in various lesions.
Practical Pathology
by Harsh Mohan

Salient Features

- Updated Content: The revised edition having 61 exercises is divided into 8 sections, patterned on the format of practical class of students. These are Techniques in Pathology (Exercise 1-5), General Pathology (Exercise 6-20), Systemic Pathology (Exercise 21-38), Cytology and Tumours Tissue (Exercise 42-55), Clinical Pathology (Exercise 56-59), Autopsy Pathology (Exercise 60-61), and Appendices (I-III: Common Instruments in Pathology, Common Similes in Pathology, and Normal Values).
- Newer Images: Exercises are enhanced by the addition of newer images at several places while older images have been deleted.

Essentials of Clinical Pathology
by Kawthalkar

Salient Features

- A concise textbook that provides basic information about laboratory techniques in clinical chemistry, hematology, and blood transfusion.
- Theoretical principles of tests & conditions for MLT students and technicians.
- Includes recent advances and updating in all chapters.
- Some new chapters have been added, such as Basic Principles of Laboratory Medicine, Examination of Serous Body Fluids and Synovial Fluid, Pyrexia of Unknown Origin, Automated Complete Blood Cell Count, Platelet Count, Hematology of Infectious Diseases, Flow Cytometry / Immunohistochemistry in Hematopathology, Antibody Screening and Identification, Whole Blood, Blood Components and Blood Derivatives.

Essentials in Hematology and Clinical Pathology
by Nayak & Rai

Salient Features

- Thoroughly revised and completely updated.
- Highly illustrated in multicolour, bulleted-format, and student-friendly.
- Includes updates on recent changes in hematology.
- A new chapter 67 on ‘Clinical Scenarios’ is added to help the student solve the clinical-oriented questions asked in a few university examinations.
- A summary of the important points are provided at the end of each chapter for easy recapitulation.
- Key points are provided in bold words.
- Laboratory findings of haematological diseases presented in simplified manner.

Essentials of Hematology
by Kawthalkar

Salient Features

- The third edition presents a simplified and concise text of blood disorders.
- Covers commonly encountered hematologic disorders and basics of blood transfusion in a concise manner.
- Incorporates most recent advances in the field.
- Described the classification, nomenclature, and diagnostic approach to malignant hematologic diseases as per the recent updated and revised World Health Organization Classification of Tumors of Hematopoietic and Lymphoid Tissues published in 2017.
- Information boxes included for last minute revision.
- Numerous illustrations, tables, and algorithms for rapid and ease of understanding.

Manual of Transfusion Medicine by Nayak & Nayak

**Salient Features**
- Provides basic concepts of transfusion medicine required to be known by postgraduate students and students of medical laboratory technology.
- Provides text in a simple, lucid and reproducible format.
- Text enhanced by illustrations, photographs, tables and boxes to understand the content.
- Concise text in bulleted format for easy review.
- Key points are provided in bold words so that it will help the students to brush through the entire book within few hours before the examination or viva voce.
- Added self-assessment as usual questions that are asked in the examination.

**Principles & Interpretation of Laboratory Practices in Surgical Pathology by Shariff & Kaler**

**Salient Features**
- User-friendly manual on all laboratory procedures, essential for diagnostic services as well as research purposes.
- Covers routine and special staining procedures used in the histopathology, anatomy and microbiology laboratories.
- Contains a whole chapter dedicated to microtomy, its principles of functioning, usage and maintenance; as well as lucid illustrations of the various types of microtomes.
- Deals with cytopathology in detail-processing of body fluids, fineneedle aspiration cytology (FNAC) procedures and treatment.
- Useful for technicians, postgraduates and surgical pathologists as well as anatomists, microbiologists and allied sciences.

**Rapid Review of Hematology by Nayak & Rai**

**Salient Features**
- Concise text in a bulleted format for easy review.
- The peripheral smear and bone marrow findings have been highlighted in colored background.
- Boxes have been provided at the side of main text to highlight key points and commonly expected questions during examination.
- Text is enhanced by 64 illustrations, 25 photomicrographs including X-rays and clinical photographs, 59 flow charts and tables.
- Important key words are presented in bold letters.

**A Short Textbook of Pathology by Sajal, et al.**

**Salient Features**
- Includes General Pathology, Systemic Pathology, Hematology, Clinical Pathology, and Molecular Techniques.
- University questions are attached and a practical notebook guide is added to appendix which will help the students.
- Molecular techniques like PCR, IHC, EM flow cytometry, etc. have been included with their principles, applications and procedures.
- Also helpful for students of other allied health specialties like paramedics, nurses, laboratory medicine and even postgraduate students.

**Manual of Transfusion Medicine**
- Single Colour | Paperback | 1/e, 2020 | 6.75" × 9.5" | 630 pp | 9789388958608 | ₹ 895

**Principles & Interpretation of Laboratory Practices in Surgical Pathology**
- Single Colour | Paperback | 1/e, 2016 | 6.25" × 9.5" | 340 pp | 9789352500246 | ₹ 750

**Rapid Review of Hematology**
- Full Colour | Paperback | 1/e, 2014 | 8.5" × 11" | 156 pp | 9789350909614 | ₹ 495

**A Short Textbook of Pathology**
- Full Colour | Paperback | 2/e, 2013 | 6.25" × 9.5" | 628 pp | 9789350904640 | ₹ 995
A Practical Handbook of Pathology: Specimens and Slides by Maiti

Salient Features
- Must-have concise supplement for every MBBS second professional year student.
- Comprehensive description of important Pathology Specimens and Slides which are the most important part of viva examination.
- Enriched with illustrative charts, tables and diagrams for easy understanding of difficult topics.
- Provides a rapid review of all important topics of Systemic Pathology for PG aspirants in entrance examination.
- Contains more than 100 high quality digital photographs of specimens and slides.

56 LINE DIAGRAMS & 89 PHOTOGRAPHS

Synopsis of Pathology by Anoop N

Salient Features
- Includes various selected, standard exam-oriented questions & answers.
- Mainly emphasizes on the new pattern of examination.
- Contains 50 clinical essay questions and their diagnosis.
- Pictures and flow charts have been used.
- Includes ‘Clinical Pathology’ notes which have been prepared from various laboratory textbooks.
- Great resource for MBBS students.

142 LINE DIAGRAMS & PHOTOGRAPHS

Sankara Nethralaya’s Manual of Medical Laboratory Techniques by Ramakrishnan & Sulochana

Salient Features
- The manual covers sophisticated techniques used in different specialties namely Medical Microbiology, Histopathology, Hematology, Clinical Biochemistry, Human Genetics and Molecular Biology.
- Full details have been given in respect of diagnostic tests with attractive illustrations and instrumentation.
- It would be well-received by medical and technological institutions, hospitals, clinical laboratories, teachers, research students and laboratory technicians.

Essentials of Medical Microbiology
by Sastry & Bhat

**Salient Features**

- Infective syndrome based (rather than traditional organism-based) presentation.
- Parasitology-incorporated into respective infective syndromes.
- Hospital infection control, the need of the hour - thoroughly updated.
- Overview chapters incorporated, for better understanding.
- COVID-19, added as a separate chapter.
- AETCOM module in Microbiology added.
- Recent advances and latest informations in epidemiology, treatment and laboratory diagnosis incorporated.
- Bulleted format in concise, simple and lucid language.

**Price:** ₹1195

---

Essentials of Medical Parasitology
by Sastry & Bhat

**Salient Features**

- Updates made in recent advances in laboratory diagnosis, treatment, prophylaxis, and epidemiology of each parasitic disease.
- Many controversial and debatable topics have been clarified with updated and corrected information.
- Clinical case-based essay questions, short notes, MCQs have been incorporated at the end of each chapter.
- Inclusion of more tables, flowcharts, real images and schematic diagrams for better understanding.

**Price:** ₹695

---

Essentials of Practical Microbiology
by Sastry & Bhat

**Salient Features**

- A clinical microbiology practical book, problem-based exercise (PSE) kept at beginning of each chapter.
- First microbiology book written in class wise pattern according to undergraduate practical schedule.
- Separate chapter for university practical examination showing the pattern for various universities.
- More than 600 images, kept according to the demonstrations of practical class for better understanding.
- Concise, bulleted format and to the point text; easy to read during examination. All saves student’s time.
- Simple and lucid language - makes the understanding easy.

**99 LINE DIAGRAMS & 423 PHOTOGRAPHS**

**Price:** ₹495
NEW EDITION

Essentials of Microbiology by Kumar

Salient Features
- This book is the outcome of author’s 28 years of experience in teaching medical students.
- It provides a complete coverage of medical microbiology from basic to advance as per the medical curriculum.
- Presents the concepts like a chain of information that leads to the next level.
- Divided into seven sections, viz. General Bacteriology, Immunology, Systemic Bacteriology, Virology, Medical Mycology, Miscellaneous, and Diagnostic Medical Microbiology.
- Key Points have been highlighted in every chapter for a quick review at the time of revision.

131 LINE DIAGRAMS & 47 PHOTOGRAPHS

Salient Features
- Chapterwise concise text on each topic, which helps in easy revision.
- Emphasized on selected topics, which are frequently asked in the university examinations.
- Large number of diagrams and flowcharts added.
- Life cycles of parasites made easy.
- Appendices at the end of book include additional topics.
- Separate sections for vaccines and staining methods helpful for practical examinations.
- Previous years’ KUHS-pattern question papers.

95 LINE DIAGRAMS & PHOTOGRAPHS

Handbook of Practical Examination in Microbiology by Patwardhan, et al.

Salient Features
- It is a small effort to make the practical examination easier for the MBBS and BDS microbiology students.
- Discusses exercises such as spotting, Gram’s staining, Ziehl-Neelsen staining, motility, stool examination.
- Contains slides, specimens, instruments, and animal vaccines kept for identification.
- Includes commonly asked questions for viva exam.
- Involves a few questions and answers which can be used in different patterns with little application of mind.

20 LINE DIAGRAMS & 159 PHOTOGRAPHS

Medical Microbiology
Made Easy
by Ahluwalia

Salient Features
- A precisely updated text.
- Builds confidence in students.
- Describes all topics in a simple and user-friendly manner.
- Helpful to imbibe the basics in medical microbiology.
- Presents the well-described newer topics like “Biofilm” that is a real nuisance and “Hospital Waste Management”, which is the need of the hour.
- Includes Question Bank at the end of each chapter.
- Useful for undergraduate and postgraduate students of medical, dental, nursing and other courses in microbiology.

244 LINE DIAGRAMS & 214 PHOTOGRAPHS

Single Colour | Paperback | 1/e, 2018 | 4.75” × 7”
472 pp | 9789352700974

Practicals in Microbiology
by Sengupta & Sengupta

Salient Features
- This book has been written to bring uniformity and standardization in laboratory and practical notebook among various medical colleges in India.
- Added resource for second professional MBBS students.
- It would decrease the load of both the teachers and students.
- It will help the DMLT and MSc medical microbiology students.

200 pp | 9789352501335

Textbook of Microbiology
by Kumar

Salient Features
- Well balanced coverage of fundamental aspects such as General Bacteriology, Immunology, Systemic Bacteriology, Virology, Medical Mycology, Miscellaneous and Diagnostic Medical Microbiology.
- Examines etiology, epidemiology, classification, host defences, identification, diagnosis, prevention, and control for each microbe in consistently organized chapters.
- Each chapter consist of learning objectives at the beginning and at the end know more, key points and suggestions for further reading.
- Correlates basic science with clinical practice through review questions at the end of each chapter.

401 LINE DIAGRAMS & 40 PHOTOGRAPHS

Full Colour | Paperback | 1/e, 2012 | 8.5” × 11”
724 pp | 9789350255100

The Short Textbook of Medical Microbiology
by Gupte

Salient Features
- Incorporation of the recent advances of medical microbiology.
- Written in simple, brief and easy lucid language.
- Enriched with colored illustrations, flowcharts, tables, etc. added to enhance the understanding of the text.
- A few new chapters, such as zoonosis, quality control is also included.
- Inclusion of parasitology (Protozoa and Helminths) and entomology is distinct inclusion.
- Clinical microbiology and applied microbiology has been covered sufficiently.
- The volume remains comprehensive and compact.

448 pp | 9789389776010

Buy our books online from www.jaypeebrothers.com
**Parasitology**  
*Easy to Learn*  
*by Chandra*

**Salient Features**  
- Complete, current and exam oriented book.  
- The synopsis helps the reader to revise the entire course in a short time-frame.  
- Provides skill-sharpening perspectives to the students to face theory, practical and viva with confidence.  
- This book would be a boon not only to the undergraduate medical students but also to post-graduate students as well.

**Textbook of Immunology**  
*by Mohanty & Leela*

**Salient Features**  
- The book provides insight of immunology, host- basic immunology, diagnostic immunology, immune response, immuno-hematology, tumor immunology, immunity against bacteria, parasites, viruses and fungi, etc.  
- Includes illustrative graphics, color diagrams, flow charts and tables.  
- Study questions are given at the end of each chapter.  
- Designed to meet the curriculum of medical, dental and other allied courses (basic and applied).  
- Helpful for doctors, researchers, teachers and students.

**Clinical Microbiology & Parasitology**  
*(For DMLT Students)*  
*by Maheshwari*

**Salient Features**  
- Written in easy-to-grasp simple language.  
- Addition of many new and important chapters, such as bacterial typing, various serological techniques, molecular level of diagnosis, etc.  
- Includes a complete section on Virology to study clinically important viruses, such as chikungunya, oncogenic viruses, herpes viruses, etc.  
- The chapter on Automation in Microbiology has been added to familiarize the readers with advanced technology in the field of clinical microbiology.  
- Enriched with illustrative images and colour plates.

**Workbook for Practical Microbiology**

*by Upasana Bhumble*

**Salient Features**  
- Written in easy-to-grasp simple language.  
- The chapter on Automation in Microbiology has been added to familiarize the readers with advanced technology in the field of clinical microbiology.  
- Enriched with illustrative images and colour plates.

**Buy our books online from [www.jaypeebrothers.com](http://www.jaypeebrothers.com)**
The Short Textbook of Medical Helminthology by Gupte

**Salient Features**
- This book provides comprehensive, illustrated and state-of-the-art update of Helminths, covers history, elementary knowledge on medical helminths along with recent advances applicable in clinical practice.
- Includes topics such as oncogenic helminths, helminthic nosocomial infections, helminthic control, prevention measures and vaccines, etc.
- Discusses hot topics like Schistosomiasis, Filariasis and Hydatidosis in detail.
- Significant summary has been provided at the end of the book to give global perspective of Helminth.
- Relevant references and glossary are provided at the end of each chapter and the book respectively.

---

Practical Microbiology for MBBS Students by Kumar

**Salient Features**
- All aspects of practical medical microbiology are covered which are easy-to-read.
- Thoroughly updated keeping in view medical curriculum and medical students.
- Divided into three units, based on the major components included within practical microbiology.
- Uses a consistent and logical chapter format throughout the book to make the contents easy to grasp.
- Learning objects are given at the beginning of the chapter.

---

Medical Parasitology by Ichhpujani & Bhatia

**Salient Features**
- A chapter has been added containing 150 original MCQs on Parasitology.
- A brief information on nosocomial parasitic infections, eosinophilia and parasitic infections has been included in the form of additional chapters.
- All other chapters have been thoroughly revised and updated.
- Emphasis has been on presenting essential information in a concise, easy-to-understand and reproducible fashion.

---

Textbook of Medical Mycology by Chander

**Salient Features**
- Addition of newer and separate chapters on Microsporidiosis, Entomophthoramycosis and Mycology Laboratory Contaminants.
- Includes new names designated to some of the fungal diseases like Malasseziosis, Talaromycosis and Emergingmycosis.
- Includes recently identified and emerging fungi and/or infections, innovative research and development of applications of new technology.
- Figures of non-invasive radiological techniques of relevant CT and MRI are inserted.
- More number of colored clinical photographs and diagrams including histopathological sections have been added.

Review of Forensic Medicine and Toxicology
Including Clinical & Pathological Aspects
by Biswas

**Salient Features**
- Magic bullet format has been used for easy understanding and quick revision of the subject of forensic medicine and toxicology.
- The text is presented in a concise and lucid form like in previous editions. It covers all the topics required for theory, viva-voce and practical.
- Line-diagrams, flow charts, tables and differentiations have been added wherever possible to make the subject interesting, easy to understand, clear the concepts, recollect and reproduce during examinations.
- Important relevant information for particular topic is highlighted in gray square crossed boxes.
- Color plates for poisons for easy identification, and some of the line-diagrams are colored for better understanding.

The Essentials of Forensic Medicine & Toxicology
by Reddy & Murty

**Salient Features**
- This current 34th edition has been updated and revised.
- Time-tested, most authentic, classical and popular textbook of FMT.
- Certain topics, such as forensic ballistics, regional injuries, anaesthetic and operative deaths, DNA fingerprinting and blood stains have been dealt with in detail to meet the requirements of medical officers involved in medicolegal work and postgraduate students.
- A few new topics procedure to be followed in dealing with medicolegal cases, virtual autopsy have been incorporated.

Practical and Postmortem Record Book of Forensic Medicine & Toxicology
by Biswas

**Salient Features**
- Consists of eight units dealing with all the essential components of Forensic Medicine and Toxicology practicals.
- Certificates, reports and notifications issued by doctors for the purposes of various acts/administrative requirements (as per MCI) are given in detail.
- Proformas and certificates are provided with hypothetical cases (problem-based learning) so that the students should take more interest in the subject.
- Clinical forensic medicine is the highlight of the practical record book.

The Synopis of Forensic Medicine and Toxicology
by Reddy

**Salient Features**
- A time-tested most authentic, classical and popular condensed synopsis of forensic medicine and toxicology for busy students.
- This current 29th edition has been updated and revised.
- 150 classical colour photographs have been added to make the subject easier.
- High demand by undergraduates, postgraduates, teachers, lawyers and researchers in Asian countries.

Concise Forensic Medicine & Toxicology by Reddy

Salient Features
- It deals with every aspect of Forensic Science.
- Designed to meet the needs of undergraduate students.
- Contains 36 chapters written in simple language.
- The format of the book has headings and sub-headings.
- All important points and terms have been highlighted with ‘bold’ text.
- Reader friendly and easy-to-remember.

Modern Textbook of Forensic Medicine & Toxicology by Mahanta

Salient Features
- The book covers contemporary practice of Forensic Medicine & Toxicology.
- Chapters are contributed by notable forensic experts giving more importance over practical experience.
- Covers latest significant topics such as forensic osteology; forensic odontology; forensic serology; human rights, custodial torture and deaths; crime scene investigation and techniques in museum.
- All the text illustrations are updated with the recent advancement in forensic medicine.
- Enriched with distinct colored photographs, drawings, sketches, flow charts, and tables.

Salient Features
- First Book on Practical Forensic Medicine.
- Written with a view to cover practically all aspects of legal medicine to which a medical doctor should be conversant with.
- Includes techniques to handle and trace evidences and gives insight into the setup and working of forensic science laboratories.
- The added attraction of this book is the chapter of ‘DNA’, Important Laws and Acts and Court Evidence.
- This book is of utmost importance in detecting crime and successful prosecution of the criminals.

Diagnosis & Treatment of Poisoning and Drug Overdose Made Easy by Devarajan

Salient Features
- Guides doctors in CCU to give first-aid, investigate and give proper antidote for drug overdose.
- Detailed descriptions have been given with charts and figures for diagnosis and treatment of poisoning and drug overdose.
- Specific antidotes have also been mentioned.
- A chapter on ‘Envenomation by Snakes’ has also been given.
- One chapter has been added for diagnosis and treatment of poisoning and drug overdose by pregnant women.
- Useful for medical students, postgraduates, general practitioners, casualty medical officers and ICCU doctors.

Exam Preparatory Manual for Undergraduates Medicine
by Boloor & Nayak

Salient Features
- Thoroughly revised and updated edition.
- Richly illustrated in multicolor.
- Contains everything an undergraduate student of medicine want to read before exam.
- Current guidelines are included in all chapters.
- Reader-friendly pattern, written in an easy-to-memorize, question-answer format, interspersed with relevant and commonly asked exam-questions.
- Key points are highlighted with color codes for last minute revision.
- Covers all the questions appeared in university examinations till January 2018.
- Includes all theory and most clinical scenarios.
- Management practices have been updated till March 2018.
- Includes colorful clinical images and case scenarios.
- Added X-rays, MRIs, CT scans and ECG images of common conditions with explanations.
- Attractive management algorithms have been revised and updated.

Full Colour | Paperback | 2/e, 2018 | 8.5" × 11" | 1272 pp | 9789352704941 ₹ 1095

Manual of Practical Medicine
by Alagappan

Salient Features
- Thoroughly revised and updated chapters in full color.
- Reflects the growth in different fields of internal medicine.
- Added recently updated treatment protocols and guidelines.
- Focuses on basic history taking and clinical examination.
- A large number of diagrams and MR, CT images have been incorporated.
- Reproduction of imaging studies is well presented.
- Inclusion of attractive tables and clinical photographs for easy understanding.
- Extensive use of color-codes for easy and interesting learning, highlighting:
  - Clinical Features in yellow colored boxes
  - Investigations in light blue colored boxes
  - Treatment and management in light green colored boxes
  - Complications in light brown colored boxes
