9789354651472 | Price- Rs. 450 | Discount Cat: C

### KEY FEATURES

- As name implies this book comprehensively covers commonly performed procedures in pediatric and neonatal healthcare settings.
  - Written after in-depth literature review of various policies and protocols by different healthcare facilities at national and international level along with own clinical experience.
  - Modern concepts in pediatric nursing, such as atraumatic care and family centered care are incorporated in carrying out the procedures.
  - Recent advances in prenatal, neonatal and pediatric care have been compiled as a unit considering the modern trend of advanced technology in child health care.
  - Normal values for various investigations of children are included in the book for easy and quick reference.
  - Figures, flowcharts and tables are used as appropriate for easy understanding of the concepts of various procedures and to develop interest in reading.
- Statement of learning objectives, key words, highlights and the memory exercise sure will enhance more meaningful learning.

### READERSHIP

- A much-awaited manual among student fraternity and staff nurses working in pediatric set-up for providing comprehensive care to this prestigious age group.
