Clinical Examination in Pediatrics

Author: Baldev Prajapati

9789389776379 | Full Color | 1/e, 2021 | Soft Cover | 5.5" x 8.5"
Pages: 538 | Rs. 1495 | Discount Cat: A

ABOUT THE BOOK

This book contains unique chapters on communication skill, ethical and legal issues in practice, and diagnosis of death which are hardly found in other books. The special aspects of child health like Developmental assessment, Diet in young children, Anthropometry, and Growth assessment are covered very nicely. Besides all the systems, it also includes Newborn, Eye, ENT, Skin, and Musculoskeletal system examination. A chapter on Common procedures is relevant to daily practice. The book has been made self-explanatory by many original clinical pictures and tables.

KEY FEATURES

- Presents the art and science of clinical examination in children with various medical disorders.
- Focus is mainly on clinical methods to elicit physical symptoms and signs.
- Aims to enhance the clinical skills of students.
- The book has been made self-explanatory by many original clinical pictures and tables.

READERSHIP

- The only IAP publication on clinical examination in children to meet the demand of graduates, post-graduates, DNB students and practicing pediatricians.
