ABOUT THE BOOK

This book is a symptom-oriented guide to clinical medicine for trainees. The fourth edition has been fully revised to present trainees with the latest advances in the field, and includes three new topics – Abnormal Involuntary Movements, Incontinence, and Sleep Disorders. The thorough text features numerous illustrations and algorithms highlighting key points to assist learning.

KEY FEATURES

- A symptom-oriented approach book containing 45 day-to-day problems (40 symptom chapters and 5 appendices along with 103 illustrations).
- Fully revised new edition covering numerous diseases and disorders, ordered alphabetically.
- Three additional topics of absorbing interest are included in the 4th edition, i.e., Abnormal Involuntary Movements; Incontinence; and Sleep Disorders.
- The quantity of information provided is qualitative with essential fast facts.
- Highly illustrated with diagrams and algorithms to assist learning.
- This manual is a clinical treasure house for the common problems faced by one and all.

READERSHIP

- This book will be invaluable as a constant companion to students (both under- and postgraduates) as well as for practitioners.
