ABOUT THE BOOK

The book is an ideal resource for keeping abreast of new developments and concepts in this constantly changing field of forensic medicine and toxicology. The latest volume in this series is written by experts in their field of specialty; featuring current topics in forensic pathology, as well as major subspecialties. This edition includes chapters on humanitarian forensics, advance directives, ethical issues in human experimentation, immunohistochemistry, safe practices for handling BSL-3/BSL-4 infected bodies, forensic neuroradiology, gunshot injuries, artifacts, viscera preservation, medical negligence, heat stroke deaths, negative and obscure autopsy, verbal autopsy, forensic pathologist in crime scene investigation, etc.

KEY FEATURES

- The book is sub divided into six section- Medical Jurisprudence and Ethical Issues; Forensic Pathology; Forensic Radiology and Immunology; Forensic Psychiatry; Forensic Science; and Forensic Toxicology.
- All the topics are well illustrated with color photographs, diagrams, text boxes, tables, and flowcharts for clear communication of concepts, and focuses on significant recent developments in the field.
- Specialized topics, which are not so frequently encountered, including both legal obligations and ethical responsibilities of those involved in forensic setting are also discussed.
- Each chapter is extensively researched and referenced.

READERSHIP

- Postgraduate students, faculty and medical practitioners
