9789354658563 | Rs. 995 | Discount Cat: D

ABOUT THE BOOK

Although this is not the first book on the COVID-19 pandemic, this book is likely to be the most comprehensive one on the subject. Whether it is a method of home isolation care or a method of intensive care management, saving lives is the ultimate goal. Psychological issues are another major area, the viral infection has affected the mental status of the caregivers as well as the general public. This book has also emphasized the importance of robust preventive measures and the means to prepare for such undesirable episodes in the future. This is a humane effort to make this book a thorough, clear, and practical summary of the disease.

KEY FEATURES

- This book covers all aspects of COVID-19 management.
- It is written in simple language, making it easy to comprehend.
- Starting from history, basic set-up, ICU set-up and management, pediatric management, pain management during COVID and even future plans to tackle, if any such disease occurs in future.
- All the contributors have first-hand experience in managing COVID-19 patients.

READERSHIP

- This book will help the practicing physicians, undergraduates, postgraduates, nursing officers and paramedics as well.
