### ABOUT THE BOOK

This edition has been prepared, keeping in mind the students of hospital administration and health administration pursuing their undergraduate and postgraduate courses. The efforts have been made to put all the available literature on the subject at one place.

The book has been classified into eight sections, namely—introduction to hospital administration, introduction to management, hospital planning, clinical services, diagnostic and therapeutic services, support and utility services, risk management, recent advances in hospital administration and last section of annexures.

### KEY FEATURES

- The objective of the book is to provide relevant information to the students and hospital and healthcare administrators in a simple, easy-to-understand language.
- Incorporate all the possible topics relevant to the field of hospital administration.
- The topics, such as transactional analysis, e-hospital, personal protective equipment and planning consideration for a medical college and its associated hospitals have been given due emphasis and included in this edition.

### READERSHIP

- Students of hospital administration and health administration
