ABOUT THE BOOK

The Essentials of Forensic Medicine and Toxicology is a time-tested most authentic, classical and popular textbook of Forensic Medicine and Toxicology. It has no parallel and still in high demand by undergraduates, postgraduates, teachers, lawyers and researchers in Asian countries. This current 35th edition has been updated, revised and classical colour photographs have been added to make the subject easier. Read it, disseminate the information and give us feedback to improve it further.

KEY FEATURES

- The book has been revised according to new curriculum of National Medical Commission (NMC).
- Time-tested, authentic, and classical textbook.
- Key points are highlighted in the text.
- Advances in laboratory investigation have been included.
- Covers standard guidelines by ICMR.
- Embraces all aspects of medicolegal problems.
- Certain topics, such as forensic ballistics, regional injuries, anaesthetic and operative deaths, DNA fingerprinting and blood stains have been dealt with in detail.
- Supplemented with photographs, tables, line diagrams for better understanding.

READERSHIP

- It is intended primarily to meet the needs of the undergraduate medical students, and also useful to medical officers, postgraduates, doctors and lawyers, etc.
