MCQs in Critical Care
Yatin Mehta & Prashant Kumar

Key Features
- A concise pain management textbook to assist the reader in making a clinical decision during a patient visit.
- Evidence-based content, based on the anecdotal experience of the authors.
- Each chapter contains 1-2 pages of text and a clear and algorithmic approach to the particular topic.
- Provides cutting-edge treatment options and advanced non-invasive modalities.

Key Features
- A comprehensive review book on anesthesia.
- Provides a fully revised and updated text as per the latest evidence of the management of various cases as well as the new guidelines.
- Thoroughly discusses the equipment and table-wise topics, such as arterial blood gases (ABGs), electrocardiograms (ECGs), pulmonary function tests (PFTs), cardiovascular exercise testing (CPET), etc., normally encountered in the examination.
- Includes all the complicated cases and the entire range of anesthesia equipment.

Key Features
- All new MCQs based on core concepts on each topic.
- Each question has separate explanations and references for further reading.
- Chapterwise arranged MCQs.
- Two model question papers for practice.
- A must-read book for all interested in critical care.
Anesthesia, Critical Care & Pain Management

**Handbook of Pulmonary and Critical Care Medicine**
SK Jindal

- 2nd Edition
- Single Colour | Soft Cover | 2/e, 2019
- 6.25” x 9.5” | 838 pp | ₹1650

**Atlas of Critical Care**
Yatin Mehta & Jeetendra Sharma

- 2nd Edition
- Full Colour | Hardbound | 1/e, 2019
- 8.5” x 10.75” | 644 pp | ₹5495

**Understanding Anesthetic Equipment & Procedures: A Practical Approach**
Dwarkadas K Baheti & Vandana V Laheri

- 2nd Edition
- Full Colour | Soft Cover | 2/e, 2018
- 8.5” x 11” | 578 pp | ₹2995

---

**Yearbook of Anesthesiology-8**
Raminder Sehgal & Anjan Trikha

- Single Colour | Soft Cover | 1/e, 2019
- 6.25” x 9.5” | 368 pp | ₹1895

**A Handbook of Emergencies**
Aspi F Golwalla & Sharukh A Golwalla

- 9th Edition
- Single Colour | Soft Cover | 9/e, 2019
- 4” x 6” | 582 pp | ₹550

**Ultrasound in Critical Care**
Puneet Khanna

- Single Colour | Soft Cover | 1/e, 2019
- 6.75” x 9.5” | 310 pp | ₹1950

---

**Key Features**
- Present concise, yet comprehensive information for day-to-day practice.
- Includes 161 chapters to cover clinical respiratory medicine, critical care, sleep medicine and respiratory perspectives.
- It is reader-friendly with simple language.
- Written by eminent authors from across the globe.
- Useful for educators, pathologists, intensivists, intensivists, pediatrics, medical students and practitioners, who are treating patients with lung diseases.

**Key Features**
- Consists of 8 sections which are further divided into chapters according to different domains of sections contributed by separate author(s).
- All major specialties related to critical care are covered in initial seven sections and last section covers rest of specialties and miscellaneous images.
- Includes images of various radiological studies relevant to critically ill patients.
- A must for any modern ICU and exam-going students.

**Key Features**
- This is the second edition after tremendous success of the first.
- Written by experts with high academic credentials, inclination, and capability.
- Gives an insight into the basic physics as well as the mechanism involved in the structure of various equipment used in anesthesia and critical care.
- Only “anesthesia equipment” book that includes DVD-ROM that serves as an audio visual aid for a clear understanding of day-to-day anesthetic procedures.

**Key Features**
- Published by the Indian College of Anesthesiologists.
- An excellent source of anesthesiology literature on current practices.
- Includes topics of current interest to both students and practicing anesthesiologists.
- Reviewed by experts from various sub-specialties of anesthesiology, general and regional anesthesia, critical care, and chronic pain.
- Recommended reading for the trainer, practicing anesthesiologists and for the intensivists.

**Key Features**
- Revised edition of the popular pocket reference.
- Covers in brief the diagnosis and management of common and uncommon emergencies encountered in day-to-day practice by the clinicians.
- Aims not to delay in the diagnosis and appropriate pharmacotherapy and accessory aids for a successful outcome.
- Covers topics on pediatrics, dermatology, ENT, ophthalmology, gynecology, psychiatry, gastroenterology, respiratory and cardiovascular, neurology, hematology, urology, immunology, oncology, forensic and community medicine, and surgery.

**Key Features**
- Comprehensive coverage of the fundamentals of ultrasound use in critical care.
- Guidance on ultrasound procedures enables practitioners to use ultrasound for vascular and therapeutic procedures.
- Cardiac ultrasound chapters help you assess and monitor the patient’s cardiovascular status continuously.
- Color presentation, with illustrations that emphasize the basic skills required to visualize anatomic structures and interpret findings.
Applications of Ultrasound in Anesthesia: A Handbook
Kavita S Lalchandani

Practical Applications of Intravenous Fluids in Surgical Patients
Shaila Shodhan Kamat

Interventional Pain Management
A Practical Approach
Dwarkadas K Baheti, et al.

Key Features
- Presents the text in simple language.
- Provides practical tips about ultrasound-guided procedures in anesthesia.
- Includes basic terminologies of ultrasound along with neat and clean images.
- Helpful to the readers while performing the ultrasound-guided procedures.
- A must for the students, beginners and practitioners of ultrasound.

Key Features
- Includes the fundamentals of body fluid balance.
- Detailed discussion of all the commonly used intravenous fluids.
- Compact and yet detailed practical approach to fluid therapy in various surgical conditions
- Wide array of self-explanatory figures.
- Language used is lucid and easy to understand.
- Conveys the knowledge in a simplified and systematic manner.
- Serves as a good teaching guide to the advanced users, too.

Key Features
- A comprehensive guide which includes the latest advances in anesthesia and brand new content.
- Edited by international experts in anaesthesiology from the US, UK and India.
- Enhanced by nearly 400 images and illustrations and an accompanying DVD depicting common interventional pain treatment procedures and a stepwise guidelines.
- An essential resource for anaesthesiologists and all pain management clinicians.

Forthcoming Books

Textbook of Critical Care
Including Trauma and Emergency Care
Yatin Mehta

RRT & ECMO in ICU
A Reference Book for Practising Intensivists
Rajesh Chandra Mishra

Short and Long Cases in Anaesthesia
Puneet Khaana & Abhishek Singh

Tentative Covers
Anesthesia, Critical Care & Pain Management

Monitoring in Anesthesia and Critical Care
Anjan Trikha & Preet Mohinder Singh

Handbook of Pain Management
A Case-based Approach
Under the aegis of Society for Study of Pain, Mumbai
Jitendra Jain

Key Features
- This book provides extensive coverage of most primitive to most modern monitoring technologies.
- A comprehensive yet concise description of various monitors is included.
- Includes structured text on obstetric critical care.
- Focuses on research based upcoming monitoring ideas like quantifying pain, isolation, and maximum heard safety improvement.

Key Features
- Chapters are written by the renowned Pain Physicians of Mumbai, under the aegis of Society for Study of Pain, Mumbai (SSPN).
- Explains in short and simplified stepwise approach to identify and diagnose different types of pain along with stepwise direction to treat the pain.
- Useful to medical fraternity to manage any type of pain.

Airway Management
Geetanjali S Verma

ICU Manual
Prem Kumar

Principles of Critical Care
Farokh Erach Udwadia

Key Features
- A single book that compiles all details pertaining to airway management.
- Explains anatomy, physiology and pharmacology.
- Includes latest guidelines in airway management.
- Discusses ultrasound and diawy.
- Contains latest equipment in airway management.
- Useful for those preparing for MD/DNB/Anesthesiology superspeciality in India or FRCA/EDAC/EDIC in the European subcontinent to USMLE and Anesthesia examinations in USA/Canada.

Key Features
- Includes simplified presentation of the basic concepts of critical care enabling the reader for better understanding of the topic.
- Provides multidisciplinary clinically oriented approach in dealing with the critical care illnesses, including pathophysiology, diagnosis and management of conditions with recent guidelines.
- Presents colorful illustrations, flow charts, drug dosages, clinical scores to help the clinician for faster reference.
- It is a comprehensive and user-friendly book for postgraduates of internal medicine, anesthesia, pulmonary medicine, surgery, emergency medicine and other specialties.

Key Features
- A standard text on critical care medicine.
- Critical illnesses are explained with regards to their clinical features, pathophysiology, diagnosis and management.
- The critical care of fulminating infections in the tropics is given special emphasis.
- Deals with critical care problems common to both East and West.
- Includes excellent images in relation to pathologies involving the chest, abdomen and central nervous system.
Textbook of Emergency and Trauma Care
Devendra Richhariya

Full Colour | Soft Cover | 1/e, 2018
8.5" x 11" | 876 pp | 9789352701919 | ₹ 2995

Key Features
- A comprehensive book covering almost all aspects of emergency medicine such as pre-hospital care, in hospital care, trauma, toxicology, and management of mass casualty.
- Contains 16 sections and 100 chapters, enriched with knowledge of about more than 100 contributions.
- Includes pre-hospital care and care of patient during transfer.
- Describes concept of need and air transfer of patient, triage and rapid assessment of patient, point of care testing, care of critically ill patient in emergency.

Manual of Extracorporeal Membrane Oxygenation (ECMO) in the ICU
Poonam Malhotra Kapoor

Full Colour | Hardbound | 1/e, 2014
8.5" x 11" | 392 pp | 9789350006330 | ₹ 7595

Key Features
- A comprehensive and an easy-to-read book on extracorporeal membrane oxygenation (ECMO) for the first time in India
- Includes topics such as ECMO and sepsis, Infection control in ICU, ECMO and ECMO, ECMO in noncardiac surgery, and ECMO and continuous renal replacement therapy (CRRT), which have not been described in literature with ECMO earlier
- Illustrations with easy-understand colored flow diagrams on ECMO hardware and circuit
- Contains more than 1,100 multiple choice questions (MCQ).

Rudy Garza III

Two Colour | Hardbound | 1/e, 2018
6.75" x 9.5" | 110 pp | 9789352703029 | ₹ 950

Key Features
- A step-by-step fluoroscopic guided pain procedure atlas covering cervical, spine, peripheral nerves, and joint injections.
- Designed for trainees at any level.
- Comprehensive but concise, no unnecessary fluff.
- Bulleted description of the procedure.
- Radiographic images with target and confirmation views.
- Quick reference or on the spot guidance to uncommon pain procedures.

Textbook of Pulmonary and Critical Care Medicine
SK Jindal

Full Colour | Hardbound | 2/e, 2017
8.5" x 11" | 2118 pp | 9789385999894 | ₹ 1395

Key Features
- Divided into two volumes containing 163 chapters in total.
- Completely revised edition with updated information, referenced with most recent citations.
- Specifically focuses on pathophysiology, pulmonary interventions, newer diagnostic techniques and treatment modalities.
- Contains separate sections on respiratory history, physiology, pharmacology, radiology and diagnostic techniques.

Drugs in Anaesthesiology
(Previously Known as Comparative Pharmacology for Anaesthetists)
Vipin Kumar Dham

Single Colour | Soft Cover | 2/e, 2018
4.5" x 7" | 314 pp | 9789352701254 | ₹ 495

Key Features
- The second edition presents anaesthetic drugs in a comparative format and in tabular form.
- Includes line diagrams and flow charts for easy understanding of the concepts.
- References are given at the end of chapters and new drugs have been added under miscellaneous category.
- Clinical studies published after year 2000 have been used for reference.
- A new chapter has been introduced to explain pharmacological terms relevant to an anaesthesiologist.
Key Clinical Topics in Orthopaedic Trauma
Alex Trompeter, et al.

Practice Guidelines in Anesthesia - 2
SK Malhotra

Short Textbook of Anesthesia
Ajay Yadav

Key Features
- 100 topics presented in alpha order, from Amputations—mangled extremities and decision making, to Whiplash.
- Succinct coverage of orthopaedic trauma treatment modalities and complications.
- Effective exam revision for FRCS (Ortho) candidates.
- Ideal quick reference for day-to-day practice.

Key Features
- An official publication of Indian College of Anesthesiologists (ICA), an academic branch of Indian Society of Anesthesiologists (ISA).
- Contains twenty-six current topics that cover the recent practice guidelines for preoperative preparations, perioperative problems and their management during anesthesia, pain management and critical care therapy.
- Includes chapters on current practice in Cardiovascular Resuscitation, organization of anaesthesia department and ethical practice.

Key Features
- Focuses on the topics asked more frequently in pre-PG examinations.
- Most important points are presented in italics.
- Key points are given at the end of each chapter.
- Summary of topics has been presented in a tabular form.
- Recent advances in drugs, equipment and techniques have been incorporated.
- Cardiovascular resuscitation (CPR) guidelines are based on the American Heart Association (AHA), 2015, update.

Key Features
- The book represents guidelines for the diagnosis and management of common medical emergencies.
- It covers cardiac problems, respiratory, gastrointestinal, renal diseases and diabetes.
- It has the same objectives as the American Heart Association / American College of Cardiology’s Pocket Guidelines.
- Extremely useful for practicing physicians.

Key Features
- In this review, the reader stays current on the latest advanced techniques in the subject of Cardiac Anesthesia with a new section on cardiac critical care—the first of its kind in an MCQ format.
- Dedicated chapter on echocardiography with explanations, formulas, schematic diagrams and videos.
- Contains 2,100 Multiple Choice Questions (MCQs) in Cardiac Anesthesia and Cardiac Critical Care with more than 100 videos on echocardiography.
- Well suited for all candidates seeking for DNB/FYNB/TACCA/Fellowship in Transesophageal Echocardiogram (TFEE)/FRCC examinations in cardiac anesthesia and cardiac critical care.

Key Features
- This book is presented in a concise and clear format.
- Includes chapters as well as safety check lists of equipment and evaluation of the quality of care.
- It has been penned by a multidisciplinary group of experts in the field.
- An easy-to-follow and valuable book which makes for good reading for all, from postgraduates to the practicing doctors and nurse practitioners.
Anesthesia, Critical Care & Pain Management

**The Vent Book**
A Guide to Mechanical Ventilation in Emergency Room
Kishalay Datta

*Key Features*
- Deals with all necessary topics related to ventilation only.
- Prevents all the topics in a simple and easy language with all basic information for residents and students of emergency medicine in their patient management.
- Brings all topics related to mechanical ventilation in emergency room under one roof.
- Serves as a quick reference guide for all undergraduates, interns, residents, doctors working in the emergency room and ICU.

*Price* ₹750

**Principles and Practice of Ophthalmic Anaesthesia**
(Sankara Nethralaya)
Jaichandran VV, et al.

*Key Features*
- First of its kind, provides basic clinical knowledge and practical information about anaesthesia for ocular surgery.
- Intended to be a ready reference for anaesthesiologists, ophthalmologists and other healthcare professionals.
- Enriched with chapters on ocular physiology, pharmacology, systemic effects of ocular medications, effect of anaesthesia on pupil and management of painful lid and eye.
- Many illustrations have been included for easy understanding and collating the information.

*Price* ₹1495

**MCQs in Mechanical Ventilation**
A Case-based Approach (With Explanatory Answers)
Sanjith Saseedharan

*Key Features*
- Case-based discussion on mechanical ventilation.
- Problem-based solving approach.
- Includes multiple-choice questions.
- Explanations provided in each answer bringing out the reasoning of the right as well as wrong answers.
- Relevant references are provided.
- Easy reading for better understanding.
- Day-to-day problems addressed.

*Price* ₹550

**Symptom Oriented Pain Management**
Dwarkadas K Baheti, et al.

*Key Features*
- A comprehensive and practical book on various types of pains concerning the individuals as well as the treating physicians.
- Divided into sections covering basics, clinical examination and evaluation, cervical and neck pain, low back pain, upper and pelvic pain, and cancer, neuropathic, ischemic, myofascial, IARPL and challenging pains.
- Accurately presents the techniques for diagnosing the etiology and mechanism of different types of pains, which often cause a dilemma for physicians.
- Emphasizes appropriate clinical management of pains with psychotherapy, allied therapy, physiotherapy as well as alternative interventional procedures, wherever necessary.

*Price* ₹2095

**Clinical Simulation in Medicine**
for all Examinations in Cardiology, Critical Care, Anaesthesia and Pulmonary Medicine
Poonam Malhotra Kapoor

*Key Features*
- A 1st of its kind monograph from India and Asia.
- Written and edited by the experts in simulation for clinical medicine.
- Main attraction of the book is its simplicity of the text, lucidity of expression and clarity of description of the subject with vivid detailing of illustrations.
- Fully up-to-date with recent researches and practices.
- Covers the most parts of cardiac critical care on simulators.

*Price* ₹11650

**Anesthesia Review**
Kaushik Joithinath

*Key Features*
- Incorporation of latest guidelines.
- Inclusion of new chapters on transplant anesthesia, laparoscopic anesthesia and renal disorders.
- Comprehensive coverage of anesthetic management of various clinical conditions and surgeries.
- Easy to repurpose for exams.
- Details of salient facts for each topic have been added.

*Price* ₹1495
Principles and Practice of Pediatric Anesthesia
