Price: ₹ 1650
Short and OSCE Cases in Internal Medicine: Clinical Exams
for PACES, MRCP, Arab Board and Similar Exams
Wanis H Ibrahim

Key Features
- A “how to examine” paragraph precedes each case in this book, which emphasizes and explains the most competent and professional manner of examination for that case.
- A paragraph containing the important rules/clues for each case has been added and updated to help candidates understand common practical facts about that case.
- The list of cases has been expanded to include cases recently encountered by candidates in international clinical exams.

Mastering Medicine MRCP Made Easy
Archith Boloor

Key Features
- MRCP Manual is the one-stop handbook for mastering the MRCP Part 1 and MRCP Part 2 that covers latest curriculum of RCP including Clinical Sciences.
- Thirty detailed sections cover subspecialties, super specialties, and important parts of allied specialties.
- Topics are illustrated with detailed teaching notes and easy to memorise lists, including more than 600 (BG) with answers to jog memory and help in revision.
- Separate sections on medical emergencies, their clinical presentations and updated treatment protocols as per the latest international guidelines.

Interesting Cases in Hypertension: Useful Lessons on Management
Gurpreet S Winder

Key Features
- This is a unique book covering around 50 case scenarios specifically related to hypertension.
- The book has 230 MCQs on hypertension from various case scenarios which have been divided into 9 sections of various aspects of hypertension with different modes of presentation of patients.
- Particular chapter in the book covers case scenarios followed by a detailed discussion regarding the management and treatment strategies pertaining to that case; which is further followed by questions for self-assessment of doctors which can be accessed online.

RSSDI’s Insulin Monograph
(A Complete Guide to Insulin Therapy)
Sanjay Agarwal

Key Features
- The book is a treatise on the best use practices for insulin in Diabetics.
- Small and crisp chapters which provide a clear understanding on the use of insulin in all diabetic sub-population.
- The book compiles all the aspects such as types of insulins, delivery schedules, delivery modes, side effects and their management.
- Written by experts in the field with decades of cumulative experience.
- The book is a valuable resource for endocrinologists, diabetologists, physicians and postgraduate students.

Insulin Therapy Made Easy
Sanjay Kalra

Key Features
- This book aims to make insulin therapy easy to improve diabetes care in general and insulin usage in particular, across the world.
- It conveys the beauty, and brown, of insulin therapy in a reader-friendly manner.
- Covers major aspects of insulin therapy—types and profiles of different insulins, the indications.
- Inclusion of up-to-date, latest guidelines and recommendations.

Clinical Approach and Management Strategies of Medical Ailments in Women: Oorja- The Power of Her
Shibba Takkar Chhabra

Key Features
- The book: Clinical Approach and Management Strategies of Medical Ailments in Women is aimed at all medical professionals in general.
- Highlights gender-specific manifestations and management strategies of medical disorders which affect women more; either epidemiologically or in severity.
- Attempts to cover all major organ systems as separate sections.
- Talks of gender bias not only in approach to a diseased woman, but also existent in medical profession at large.
Internal Medicine

Clinical Focus Series
Bone and Mineral Disorders
Romesh K Khardori

Key Features
- Provides an update on our current understanding of the diagnosis and management of bone and mineral disorders.
- Concise, balanced coverage of both basic insights and clinical data to aid clinical decision making.
- Focuses on the skeletal and mineral homeostasis and the role and place of nutritional supplementation with calcium and vitamin D3 in skeletal health.
- Written by leading researchers and clinicians in the field to provide concise coverage of the widest possible spectrum of metabolic bone diseases and disorders of mineral metabolism.

World Clinics Diabetology:
Complications of Diabetes
Viswanathan Mohan

Key Features
- Latest volume in World Clinics Diabetology series
- Covers complications associated with diabetes in various organs and body systems
- Each article concludes with a comment from the editors highlighting key points
- Highly illustrated with clinical photographs and figures

Novel Insights on SGLT-2 Inhibitors
Rajeev Chawla & Shalini Jaggi

Key Features
- This book provides detailed information on the novel drug class SGLT2 inhibitors for the treatment of diabetes.
- All current evidences, studies and available data have been incorporated in the writing of this book to bring to the readers an updated overview of this novel drug class.
- An in depth search of literature on all topics traces how the SGLT2 inhibitors have evolved and are now a preferred option in management of type 2 diabetes, with promising data emerging on their use in type 1 diabetes as well.

Clinical Focus Series
Tuberculosis Selected Problems
Violeta M Mihailovic Vucinic & Dragana M Jovanovic

Key Features
- Provides a focused, up-to-date summary of epidemiology, microbiology, clinical assessment, diagnosis and management of this complex clinical problem, which will be invaluable for clinicians.
- Chapters on TB in children, TB in immunocompromised, nontuberculous mycobacteria multidrug-resistant tuberculosis are also included.
- Provides a clear understanding of tuberculosis scenario in India as well as the global perspective and the challenges associated with tuberculosis care.

World Clinics:
Pulmonary & Critical Care Medicine: Pneumonia
Surinder K Jindal

Key Features
- Latest volume in the World Clinics: Pulmonary & Critical Care Medicine series
- Addresses various aspects of Pneumonia in state-of-the-art manner
- Contribution from national and international reputed experts in the field.
- Discusses bacterial, fungal, viral, and parasitic pneumonia covering the epidemiology, risk factors, clinical features, and management.
- Includes a topic on pediatric pneumonia.
- Newer diagnostic methods are incorporated.

Practical Standard Prescriber
ABM Abdullah

Key Features
- The book presents in brief the etiology, clinical presentation, investigations and management of various diseases encountered in clinical practice on a day-to-day basis.
- Covers diseases pertaining to almost all systems with the basis emphasis on genetics, poisoning, psychiatric disorders, electrolyte and acid-base imbalance, and specific diseases pertaining to vitamin deficiency.
- Presented in a format which is easy to understand with annotated bullet points for quick referral.
RSSDI Diabetes Update 2019
Banshi Saboo

Two Colour (with Colour Plates) | Soft Cover
1/e, 2020 | 8.5" x 11" | 474 pp | 978938587128

Key Features
- Comprises a wide range of topics extending from the basic anatomy and physiology, cell biology and functioning and etiology.
- Epidemiology, pathogenesis, molecular mechanism, and entire spectrum of clinical aspects, controversies as well as research methodologies have been very well covered.
- Provide ideas for innovation and new research in the field.
- Includes articles and updated guidelines in the field of Diabetology.

101 Interesting Cases in Clinical Medicine
Khan Abul Kalam Azad, et al.

Full Colour | Soft Cover | 1/e, 2020
6.25" x 9.5" | 398 pp | 9789389129632

Key Features
- The book provides basic knowledge of various clinical problems that are faced by physicians.
- It analyses appropriate approach in diagnosing and management of problems.
- Provides real diagnostic and management skills which can be applied by practitioners.
- The clinical cases are compiled in stepwise pattern for physicians that focus on appropriate scientific approach for suitable diagnosis.

101 Clinical Cases in Emergency Room
Badar M Zaheer

2nd Edition

Full Colour | Soft Cover | 2/e, 2020
6.25" x 9.5" | 416 pp | 9789351270333

Key Features
- Presented in an easy-to-read format.
- Full color images and illustrations for quick and easy understanding.
- Provides comprehensive updates to all 21 chapters using the latest guidelines.
- Universal management of most common cases seen in emergency room, useful for medical students, resident physicians, nurses and all other healthcare providers.

Hypertension: A Case-Based Approach
Elizabeth W Edwards & Donald J DiPette

Single Colour | Soft Cover | 1/e, 2020
6.25" x 9.5" | 398 pp | 9789386261489

Key Features
- Comprehensive guide to diagnosis and management of hypertension.
- Chapters presented as step by step case scenarios.
- Covers treatment of hypertension with associated conditions.
- Authored by experts from the University of South Carolina.

Clinical Allergy
Rajendra Prasad

Full Colour | Soft Cover | 1/e, 2020
8.5" x 11" | 522 pp | 9789389129649

Key Features
- The book is written with the aim of defining a practical approach to every aspect of Allergy.
- Covers all the aspects of allergy ranging from epidemiology, varying presentation of allergy, diagnosis and practical approach to the treatment of various allergic diseases.
- Discusses pediatric issues in management of allergic diseases.
- Contains chapter on pollen calendar with the use of photographs of allergenic plants mainly found in India.

Textbook of Tuberculosis & Nontuberculous Mycobacterial Diseases
Surendra K Sharma

Full Colour | Hardbound | 3/e, 2020
8.5" x 12" | 1002 pp | 9789389129212

Key Features
- Multi-authored book.
- Thoroughly revised, updated and rewritten to present a comprehensive account of tuberculosis (TB) and nontuberculous mycobacterial diseases.
- It has contribution of experts from several parts of the world with a vast experience.
- Clinical presentation, laboratory diagnosis, the treatment of TB of various organ systems, prevention and control of TB are extensively covered.
- Includes revised chapter on nontuberculous mycobacterial diseases.
Signs & Symptoms in Clinical Practice
Devendra Richhariya

This is a compact, handy and bedside clinical companion book for all dedicated healthcare professionals who evaluate the patient on the basis of signs and the symptoms.

- It is composed of 91 chapters, enriched with knowledge of about more than 100 contributors.
- Covers all possible signs and the symptoms, commonly seen in daily clinical practice.
- Helpful in the initial treatment and management.

Principles of Respiratory Medicine
Farokh Erach Udwadia, et al.

- This second edition has been thoroughly revised and updated.
- The highlight of this book is the section on tuberculosis (TB), dealt with special regard to epidemiology, MDR-TB, XDR-TB, drug in use, and the newer drugs available in treatment.
- The section on newer diagnostic aids involving genetic and molecular biology.
- Every chapter is illustrated with high-quality images.

Case Studies in Diabetology & Endocrinology
Sanjay Chatterjee & Sudip Chatterjee

- A case-based approach.
- Includes real-world case studies.
- Each case report is informative.
- Cases are arranged subject-wise, starting from endocrinology.
- Each case is meant to be read independently.
- Covers a wide range of uncommon clinical problems and unusual clinical presentations.
- Suggested reading at the end of each case will further enrich reader's experience.

An Insider’s Guide to Clinical Medicine
Archith Boloor & Anudeep Padakanti

- All-in-one, medium-sized practical handbook of Internal Medicine.
- Thoroughly revised and updated content.
- Well-structured and bulleted format.
- Provides in-depth coverage in all areas of internal medicine.
- Describes recent discovery on heart attack, stroke, and peripheral vascular disease.
- Includes chapter on Hyperlipidemia discussing new therapy for diabetes.
- Aimed at practitioners, internists, family physicians, general practitioners, etc.

Systemic Fungal Infections
Principles, Pathogenesis & Practice
Monica Mahajan

- This book provides practical information on managing infections.
- Incorporates recent technological advances in diagnosing fungal infections.
- Includes in-depth description of cardinal manifestations, typical symptoms, physical signs and differential diagnosis of specific fungal infections.
- Treatment algorithms, figures and tables allow a practical approach to the management of the patients.

Internal Medicine
Diagnosis and Therapy
M Gabriel Khan

- Single Colour | Soft Cover | 1/e, 2020
- 6.25” x 9.25” | 460 pp | 9789389188349
- Key Features
  - All-in-one, medium-sized practical handbook of Internal Medicine.
  - Thoroughly revised and updated content.
  - Well-structured and bulleted format.
  - Provides in-depth coverage in all areas of internal medicine.
  - Describes recent discovery on heart attack, stroke, and peripheral vascular disease.
